### Enter the Building of the Year Contest

The MBCEA Building of the Year Contest gives us all a chance to showcase the advances and innovations our industry has made in recent years. Visit [mbceaawards.org](http://mbceaawards.org) to submit your projects before February 23, 2026. Manufacturers, please encourage your builders to submit projects. Note that this is open to MBCEA members only, so this is a great time to join!

### 2026 Renewal Dues Invoices Are Overdue

2026 Dues invoices were due on 1/1/26, with a grace period through 1/31/26. Member access to events, products, webinars,

## Greetings!

### Harnessing AI to Strengthen Performance Across the Metal Building Industry

With the MBCEA Conference approaching on April 22–24, AI will take the spotlight as a key driver of progress within the metal building construction sector. Once considered a niche technology, AI is rapidly becoming an essential tool for contractors and erectors committed to operational excellence, tighter schedules, and safer jobsites.

### Improving Project Predictability for Metal Building Teams

Coordinating design, fabrication, delivery, and erection is inherently complex. AI-powered systems can evaluate project schedules, flag potential delays, and recommend adjustments before they impact the field. These predictive capabilities help reduce rework and support smoother, more reliable project delivery—critical advantages for contractors working within tight timelines and phased metal building installations.

### Enhancing Jobsite Safety for Erectors

Safety remains one of MBCEA's core values. AI-driven cameras and sensors can now detect missing PPE, equipment hazards, and unsafe behaviors in real time, allowing supervisors to respond quickly and prevent incidents. This type of proactive monitoring is especially valuable for erection crews who often work at height and within fast-moving environments.

### Raising Quality While Reducing Rework

Rework is costly, and in metal building projects it can create schedule setbacks and coordination challenges. AI-supported quality-control tools use image recognition and 3D scanning to compare current conditions against digital plans, identifying issues early so teams can correct them before they escalate. The result is more consistent quality and a better final product.

### Supporting Workforce Efficiency Amid Labor Shortages

Labor shortages remain a concern across the construction industry, including metal building erection. AI tools that automate scheduling, material

etc. will be locked down until payment is received. Be sure to reach out if your company hasn't seen your invoice. Better yet, log into your [Member Compass](#) to pay your balance and elect auto pay for future membership renewals!

tracking, and reporting allow crews to focus on installation work rather than administrative tasks. Importantly, AI enhances—not replaces—the workforce by taking on repetitive, data-heavy tasks so project leaders can focus on leading crews and solving challenges in the field.

### **Simplifying Compliance and Documentation**

With greater attention on prevailing wage requirements, certified payroll, and regulatory oversight, AI can help contractors stay compliant. Automated data capture improves accuracy, lowers risk, and reduces the administrative burden that often falls on already-stretched project teams.

### **Positioning MBCEA Members for the Future**

Technology is no longer optional in construction—it's a requirement for staying competitive. AI strengthens safety, reduces risk, increases precision, and streamlines operations across all phases of metal building work. By adopting AI thoughtfully, MBCEA members can gain a clear advantage in an evolving marketplace and deliver projects that meet the highest standards of quality and safety. See you in Colorado Springs.

**Conference Attendee Registration Closes March 27**

This is the premiere event for metal building contractors, erectors, manufacturers and suppliers. This year's conference will be a management-style retreat with more time for networking and management education. Field personnel focused sessions will resume next year. This conference is co-located with the MBMA Spring Meeting. [Click here for the agenda, hotel information and to register](#). See who's coming on the [MBCEA app!](#)

## Register to Exhibit at the 57th Annual MBCEA Conference

Exhibiting at the MBCEA & MBMA Conference will enhance your visibility to decision-making attendees and industry professionals. Our attendees want to see and hear about what's new in our industry - products, tools, technology, etc. Review the [schedule, exhibit hall diagram, and register now!](#) Check out the profiles of the exhibitors already registered on the [MBCEA app!](#)

## Pioneers Club Applications Now Being Accepted

Please [submit the name of a colleague or yourself](#) for selection into the MBCEA Pioneers Club.

The distinct purpose behind the creation of this important Pioneers Club is the association's determination to give credit and recognition to metal building contractors and erectors who have been such for at least 25 consecutive years.

Accepted applications will become a permanent part of the history of our industry. The celebrated people who are selected as members of the Pioneers Club will be asked to attend the 57th Annual MBCEA Conference to accept the prestigious award.

---

## Thank you to our sponsors!

Conference sponsorship is now sold out. Thank you to everyone who has pledged their support!

**Plan Now for March's MBCEA Presents...  
Metal Buildings, Tighter than Air**

**March 13, 2026  
12 - 1 PM EST**

"What gets measured gets managed" (Peter Drucker), and air leakage is officially being measured as more states adopt whole building air leakage testing requirements in the ASHRAE Standard 90.1 and IECC. Join the national MBCEA Presents for a free monthly webinar to hear how the MBMA, NAIMA, DASMA and MBCEA are preparing the metal building industry for what's here and what's next, to be tighter than air!

## Technical Corner: Factory vs. Field Caulking for IMPs

MBCEA Technical Committee

Selecting between factory-applied and field-applied caulking for IMPs requires weighing controlled manufacturing against on-site flexibility. Factory caulking reduces installation labor but demands careful handling, while field caulking offers real-time quality control at the cost of added labor and complexity.

### Factory-Applied Caulking

Sealant is applied to panel edges during manufacturing.

#### Advantages:

- Labor Efficiency: Minimizes on-site caulking work.
- Consistency: Controlled environment ensures uniform application.
- Faster Installation: Supports accelerated project schedules.

#### Disadvantages:

- Damage Risk: Sealant may be compromised during shipping or handling.
- Inspection Required: Panels must be checked before and during installation; repairs may be needed.
- Handling Logistics: Protective wrapping requires careful removal to avoid contamination.
- Time Sensitivity: Improper storage or delays can degrade sealant, especially in extreme temperatures.

### Field-Applied Caulking

Sealant is applied on-site during installation using butyl tape or gun-grade products.

#### Advantages:

- Quality Control: Installers ensure proper seal at the moment of assembly.
- Flexibility: Allows adjustments for site-specific conditions.
- Optimal Adhesion: Applied to clean, dry surfaces immediately before joining panels.

#### Disadvantages:

- Higher Labor Demand: Requires skilled installers and more time.
- Installation Sensitivity: Performance depends on installer precision.

### Performance Considerations

Regardless of method, the goal is a continuous air and vapor barrier. Non-skinning butyl sealants are preferred for flexibility, accommodating thermal expansion and contraction. All joints, laps, and transitions must be fully sealed.

Knowing your project, time constraints, length of installation, weather, etc. will help to determine if you should have it factory caulked or do it in the field. Many manufacturers have specific guides for their products and please take the time to review before determining your order preference.

## Apprenticeship Corner: Apprenticeship Week Is Coming

Josh Quinter  
Quinter Corbett

National Apprenticeship Week, the annual celebration of apprenticeship designed to showcase how apprenticeship expands and improves career pathways for both employees and employers, is coming in April. The celebration takes place in all 50 states and in U.S. Territories to bring attention to both the need and benefit of apprenticeship programs. The U.S. Department of Labor has been sponsoring the event since 2015 and reports that over 2 million people have participated over the years.

It's a universal sentiment that increasing apprenticeship is a positive thing for the United States. It provides people – in particular younger people – a great opportunity to create and grow a rewarding career. The exodus of baby boomers from the skilled trades combined with the lack of young people going into them has also created a massive shortage of workers that will make it hard for the labor supply to keep up with the demand moving forward. This is especially true in the ever-changing technological environment. So employers and the economy at large are in need of more skilled workers.

## Construction Law Corner: The Largest Legal Issue for 2026 – According to Lawyers

Josh Quinter  
Quinter Corbett

As 2026 gets up to full speed, it's a good time to pause and consider what might be the biggest challenges to face your company in the next 12 months. Lawyers are only 1 constituent group in the conversation; and they admittedly tend to identify issues on which they are interested in working. This being said, the chatter in the legal community is likely on point right now. Whether it's first on the list or not, the impact of AI is certainly near the top of everyone's list of challenges this year.

I'll get an obligatory but important statement out of the way first: artificial intelligence brings immense benefits with it and is a good thing. The trouble, however, is that many people are so enraptured with its benefits that they fail to see the dangers that come with it. To say that there is a plethora of them is an understatement. It would take an entire year of newsletter articles to even scratch the surface of this issue. As a way to help MBCEA members spot where the issues arise and ask the right question, here's a sampling of potential issues.

## AC478 - MEMBER SPOTLIGHT

Reaching New Heights, Together

METAL BUILDING  
CONTRACTORS & ERECTORS  
ASSOCIATION

What benefits has your company experienced due to the AC478 process and accreditation?

“AC478 helps you to constantly monitor, evaluate, improve, and document your quality, safety and training protocols and procedures. As a result of our AC478 accreditation, we have seen a renewed focus and attention in the three critical areas of quality, safety and training.”

–Steven Hudgins, LEED AP, Rainwater Construction Company

Learn more about AC478 Accreditation at [mbcea.org](http://mbcea.org)

Have questions about AC478? Contact [Jackie Meiluta](#) Check out the [AC478 section](#) of the [Members Only area](#) of the MBCEA website. Hear from your peers on the [MBCEA YouTube channel](#).

## PROVE YOUR QUALITY WITH ACCREDITATION

### AC478 Roundtable Thursday, March 12, 2026 - 2 pm EST

At this month's roundtable we will explore how to choose a job site for your annual assessment. As always, the AC478 panel of accredited members will be available to answer all your questions.

## MBCEA Chapter News

### Greater Ohio Chapter

Greater Ohio Chapter 2026 Kick-Off - **March 5, 2026**

Join Greater Ohio MBCEA members and industry partners for a relaxed evening of networking, food, and drinks at [Urban Meyer Pint House](#). This is a great chance to connect with erectors, builders, suppliers, and PEMB professionals from across the region.

We'll be gathering in the same private room we used previously - great atmosphere, plenty of space, and perfect for conversation.

Food and drink selections will be available throughout the event.

**RSVP by Friday, February 20, 2026:**

Please confirm your attendance with [Orris Schlabach](#).

We Hope to See You There!

If you have any questions about the event, feel free to reach out.

Cheers!

### Pacific Northwest Chapter

Pacific Northwest Chapter Topgolf Chapter Planning / Networking Event - **March 6, 2026**

The Metal Building Contractors and Erectors Association Northwest Chapter is hosting a networking/recruiting event and would like you to attend.

Join us for an evening of leisure at Topgolf in Renton, WA

**\$35 per person**

Entry Fee Includes:

- Topgolf Games
- Appetizers
- 2 drink tickets

Each person must pay the \$35 entry fee, even if you bring multiple people from your company. \$500 Sponsorships are available. Sponsorship includes advertising mentions, acknowledgment at event, drink ticket bundle, and free entry for two participants.

As a current MBCEA member, you are encouraged to be present and bring with you conversation topics you want to explore, future event ideas, or maybe your expertise for questions others may have. An association is only as strong as its members.

Help us grow this chapter by including the industry contacts you know and trust.

Lastly, we are always looking to grow the association, and specifically this local Chapter. Members, even if you cannot make it, we encourage you to invite non-members interested in joining the MBCEA to this particular event. Spread the word. We will have in attendance folks that can speak on the benefits of membership.

Contact [Brian Shelton](#) if you plan to attend or want to sponsor.

---

## New England Chapter

2026 MBCEA NEC Scholarship application is now open.

[Apply Here](#)

**Save the Date!** The 35th Annual New England Chapter Golf Tournament will be held on **7/23/26** at Waverly Oaks Golf Club in Plymouth, MA. Sponsorship Registration and Golf Entry Forms will be going out at the end of the month.

---

## Ontario Chapter

**SAVE THE DATE!!!!**

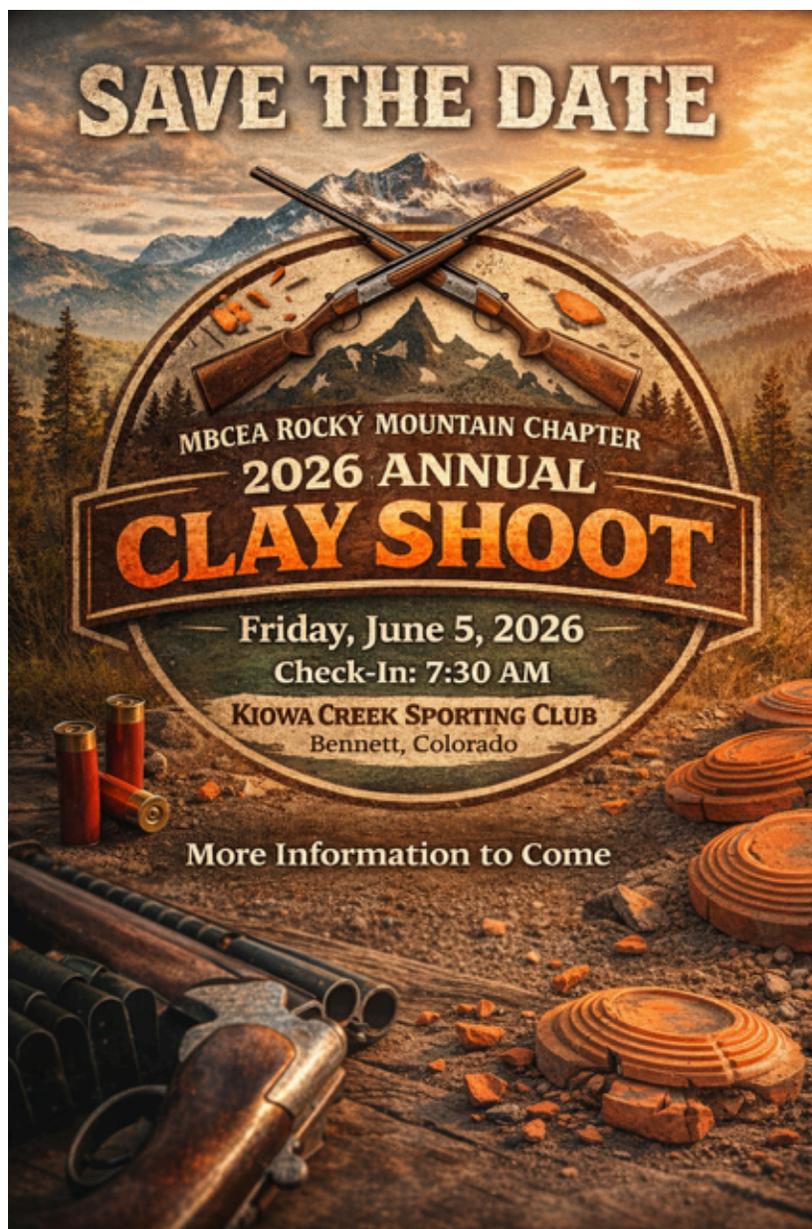

MBCEA Ontario Chapter will be hosting its first golf tournament at Blue Spring Gold Club in Alliston ON on **June 15, 2026**. We welcome members from other Chapters, National's board of directors and vendors to join the Ontario Chapter for a great day on the course. The event will include 18 holes of golf, power cart, dinner and opportunities to connect with amazing people across our industry.

MBCEA Ontario Chapter will have representatives attending the 57th annual MBCEA National conference in Colorado Springs. We look forward to connecting with other chapters and members.

Website – Keep your eye out for MBCEA Ontario Chapter's website! We hope to have this up and running by the end of April.

## Rocky Mountain Chapter

---

## Carolinas Chapter

While the Summer Meeting is still several months away, we are continuing to make plans for this much anticipated and enjoyed event. Please mark your calendars for **June 18-21** and make plans to join us. Make note the agenda linked below for the meeting this year has changed from years past. Also, links for Sponsorship and hotel reservation are below. Hotels must be reserved by end of day on **Friday, May 8th, 2026**.

If you have any questions, please email Joyce at [carolinas@mbcea.org](mailto:carolinas@mbcea.org). Anyone with questions regarding sponsoring, please email Reggie at [rmoore@brentongrey.com](mailto:rmoore@brentongrey.com). Registrations for sponsors should reach out to Joyce at the email above. We greatly appreciate your support of this event.
