

Cutting Edge Drug Discovery & Development Symposium in Michigan

May 11, 2026 | Ann Arbor

Showcase your work:

CALL FOR SCIENTIFIC POSTERS!

Academic drug discovery has become a vital complement to traditional pharmaceutical development, fueling the search for innovative new medicines. The Cutting Edge / Drug Discovery & Development Symposium provides a platform to highlight research and development efforts across Michigan's universities, research institutes, and biotech/pharma companies.

We invite faculty, students, and researchers to present scientific posters that showcase their projects, case studies, and new technologies in drug discovery and development. Poster presentations offer an excellent opportunity to share your work, spark meaningful conversations, and build connections with peers, industry professionals, and potential collaborators.

POSTER SUBMISSIONS

The Symposium is an excellent opportunity to share research, case studies, and new technologies. Poster must be relevant to the main program topics.

- Assay Development and Screening
- Clinical Trials and Development
- Decision Support and Tools
- Medicinal Chemistry Lead Discovery
- Platform Enabling Technologies
- Pre-Clinical Optimization
- Target ID & Validation

Poster abstracts containing abstract title, author, description and university affiliation should be submitted [here](#).

REGISTRATION

Register at www.michbio.org/events/2026-drug-discovery-and-development-symposium.

Discount registration is provided to students and academic faculty/staff.

SUBMISSION DEADLINE: April 15, 2026

There is no cost to submit an abstract, however, event registration is required for submission to be considered.

POSTER SPECIFICATIONS:

Poster dimensions are 48"x36" and must be landscape orientation.

PRESENTATIONS:

Posters will be displayed throughout the day during networking breaks and lunch in the exhibit hall.
