

## Chemical Hazards and Hazard Communication Training

Messaging to customize for communications, social media and advertisements

---

Did you know that hazard communication has been in OSHA's top ten list of most common violations for the past twenty years or more? Recently, it became the #2 most-cited standard during OSHA inspections, a dubious distinction, to say the least.

Please join [<Utility or Community Name>](#) on [<insert date>](#) and attend an essential training event. Chemical Hazards and Hazard Communication training is a 60-minute session that provides a basic understanding of working with hazardous chemicals and how to prevent and protect yourself from chemical hazards.

### **Raise your awareness and improve safety in the workplace.**

An additional advanced train-the-trainer session is also available for business owners and supervisors who would like to understand the expectations of business owners and supervisors. This session will occur directly after the main training session.
