AI Explained

Speaker Information:

Charles Davis

Charles Davis is the Cofounder and Chief Visionary Officer (CVO) at CrazyThink, an AI SaaS and consulting company based in Tampa, Florida. He specializes in creating applied AI systems that improve support services, enhance user experience, and make information more accessible across a variety of organizational settings. Charles is known for making complex AI concepts simple and understandable, and he frequently educates institutions on how to adopt AI responsibly and effectively.

He has presented on AI and its real world applications at Hillsborough Community College, the NACCE National Conference, and The Bolles School. Through his work with colleges, nonprofits, and companies, Charles designs AI tools that provide clear value and integrate smoothly into existing workflows.

About CrazyThink

CrazyThink is an AI SaaS and consulting company that builds real world solutions for education, workforce programs, and business environments. The company develops practical AI tools that support learners, entrepreneurs, and organizations by improving access to information and streamlining support services. CrazyThink partners with institutions to design AI systems that create measurable impact and fit seamlessly into existing operations.
