
“VISION” MAGNETS PROJECT

SMALL, VISUAL REMINDERS TO MANIFEST YOUR DREAMS

YOUR KIT CONTAINS:

Flat Glass Marbles

Mod Podge

Foam Brush

Magnets

Magazine Clippings

YOU WILL NEED:

Scissors

Pen or Pencil

Hot Glue Gun*

**Super Glue, or another strong household adhesive may be used*

HOW TO MAKE YOUR MAGNETS:

- Place the flat side of your glass bead onto the image – this could be a photo, a piece of fabric, magazine clippings or paper – that you would like to see on the face of your magnet.
- Trace the circular shape onto the image.
- Cut out the shape with a pair of scissors
- With your foam brush, paint a thin layer of mod podge onto the flat surface of your glass magnet.
- Adhere your picture to the glass marble. The side you want to see on the front of the magnet should go directly onto the mod podge painted surface.
- Allow the paper to dry 15-20 minutes, then paint a “sealing layer” across the paper and remaining visible glass.
- Allow to dry overnight.
- Using a hot glue gun or other strong household adhesive, glue your magnet onto the back of your newly decorated flat-backed glass marble.

ENJOY!
