

CLEARER VISION

Residential Project Under $25,000 | Minneapolis Condo

Introducing the Project

Inspired by the homeowner's passion for art, this project showcases how innovative lighting design can transform a residence. Through expertly crafted design, fixture integration, precise aiming, and thoughtfully layered illumination, the team created a gallery-quality environment that enhances artwork, architectural features, and spatial depth. The result is a seamless blend of technology, craftsmanship, and design that delivers both elevated functionality and a striking visual experience.

Before images

Client Objectives & Existing Conditions

- Create gallery-quality illumination
- Highlight artworks and sculpture
- Remove visual clutter
- Modernize dated fixtures
- Enhance architecture with depth and drama

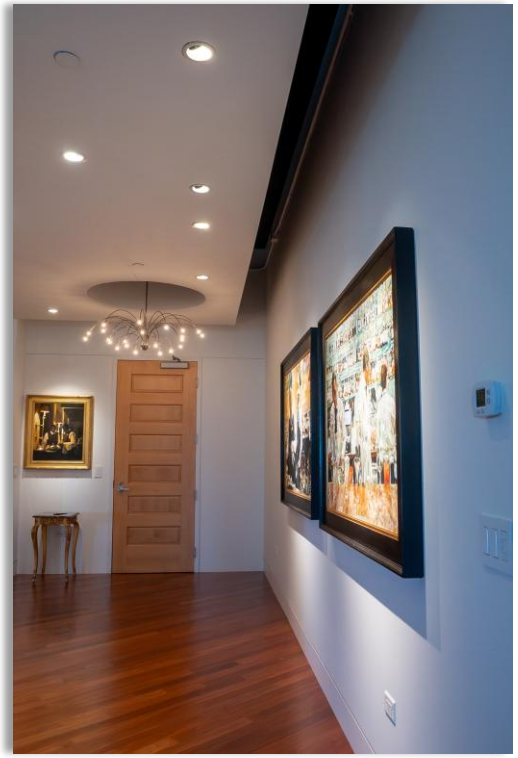

Before

After

Entry Gallery Transformation

The existing track system was replaced with precision recessed directional luminaires. By integrating the lighting into the ceiling plane, the artwork becomes the focal point while the architecture remains clean and refined. From visible fixtures to invisible illumination.

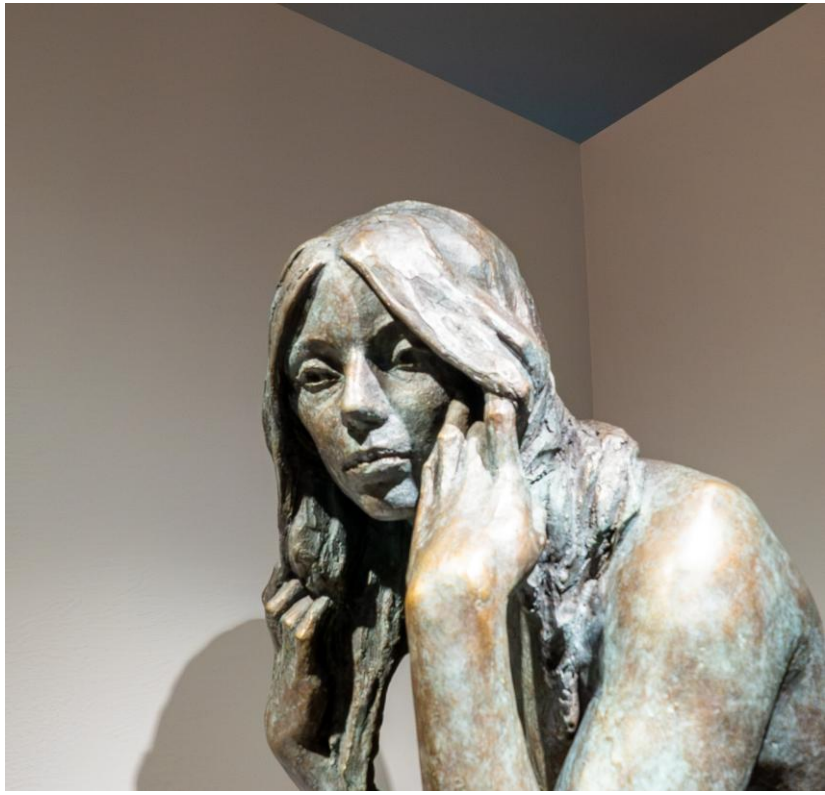

Sculpture Lighting

Lighting was carefully aimed to reveal texture, form and dimensionality, creating dramatic focal points from multiple viewpoints.

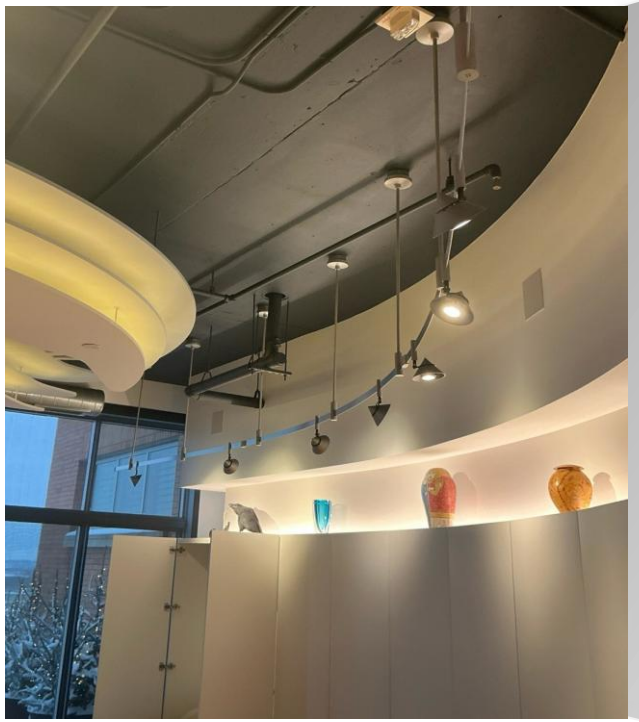

Back Room Lighting

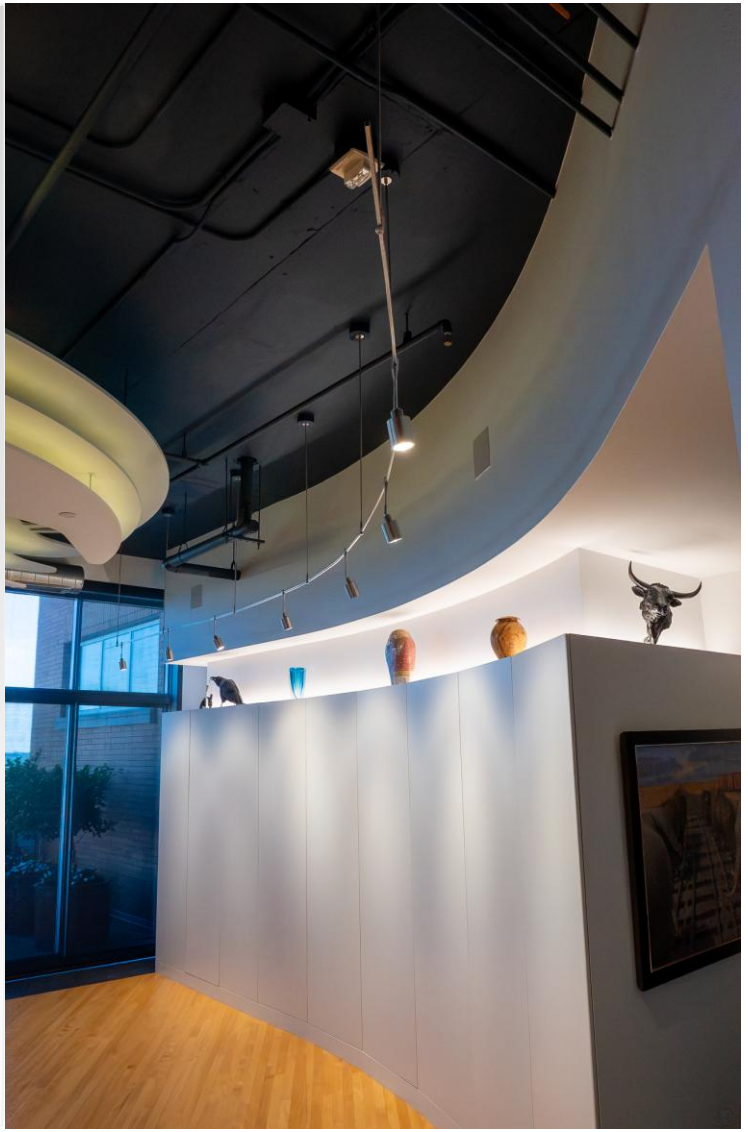

The existing track lighting was replaced with a sleek monorail system that follows the room's sweeping geometry, elevating the space while preserving comfort and livability.

Before

After

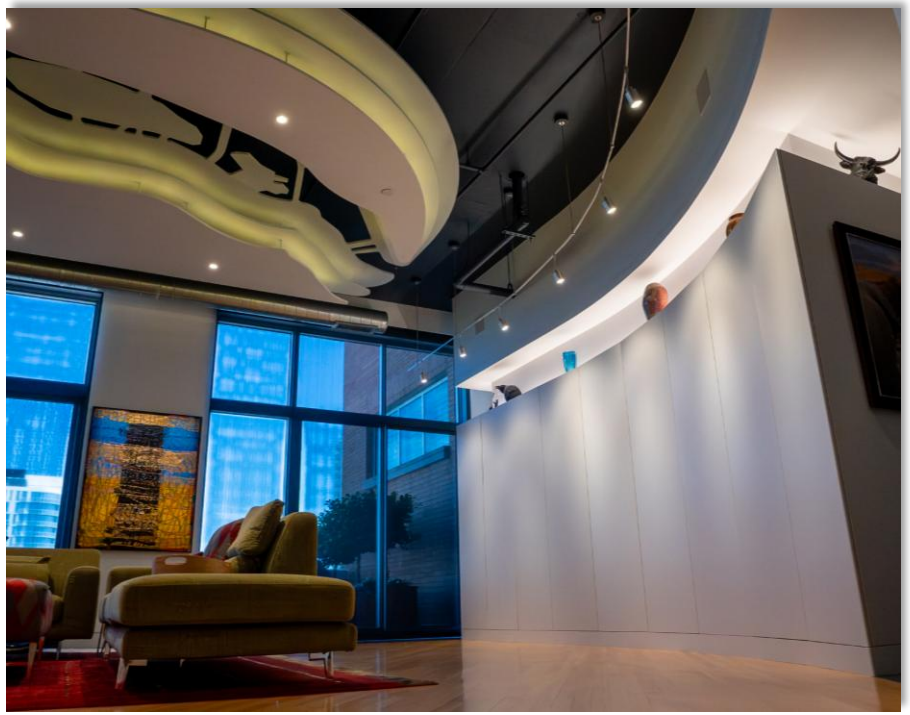

Curved Gallery Wall

Intentional illumination transforms the curved display wall into an architectural feature.

Design Impact

By balancing innovation, craftsmanship, and design, the lighting transformation elevates the homeowner’s collection while creating a gallery-quality experience that seamlessly blends beauty, functionality, and architectural sophistication.
