

Color Galore

Client Objectives

Our clients, modern art collectors with a passion for entertaining, challenged us to transform a former laundry room into a party room that was anything but ordinary.

With the pool just steps away and gatherings a regular part of life, the underutilized space needed a clear purpose: a lively, hardworking hub that could effortlessly support everything from casual family get-togethers to larger celebrations.

Laundry Room Before

Design Solution

- The dated laundry room was fully remodeled into a high-functioning party room, making better use of the existing footprint while improving its connection to the adjacent kitchen. Existing plumbing and utility locations were repurposed for a dedicated beverage center, allowing the renovation to capitalize on existing infrastructure while giving the space an entirely new function.
- The new layout was engineered around entertaining, with dual refrigerators, a prep sink, dedicated work zones, concealed small-appliance storage, and generous center circulation for bartenders and guests. Corner drawer systems capture previously difficult-to-access space, while floor-to-ceiling pantry cabinetry significantly increases storage for glassware, serving pieces, paper goods, party supplies, and mudroom overflow.
- New slab-style cabinetry, integrated appliances, open shelving, and updated wall finishes completely transform the former utility space. Strategic use of red, blue, and yellow cabinetry adds personality while maintaining continuity with the kitchen's white cabinetry.
- The remodel transforms an underutilized laundry room into a purpose-built entertaining space through strategic space planning, reuse of existing infrastructure, and customized storage solutions.

Prep Sink

- The prep sink overlooks the pool deck, creating a direct visual connection to the outdoor entertaining area. Slab-style white cabinetry matches the primary kitchen, while the white Brizo faucet visually recedes against the bold color-blocked panels.

A Place for Everything

- Storage was essential to transforming this former laundry room into a hardworking entertaining space. Custom cabinetry maximizes every inch, providing dedicated storage for glassware, serving pieces, beverages, small appliances, paper goods, and party supplies.
- Adjustable shelving, pull-out drawers, corner storage, and tall pantry cabinets keep everything accessible and organized, while open shelving and curated display areas provide opportunities for art and colorful barware—making the room as delightful as it is functional.

Corner Drawers

- Even the corner drawers combine playful design with purposeful function. Engineered to capture otherwise underutilized space, they provide efficient, accessible storage while maintaining the room's graphic aesthetic.
- Coordinated dishware extends the color story inside the cabinetry.

Pull-Out Drawers

- Pull-out drawers improve visibility and access, while adjustable shelving accommodates taller bottles and specialty barware.
- Colorful MoMA glassware reinforces the room's art-inspired palette.

Storage Wall

Wide drawers accommodate small appliances and oversized serving pieces, while tall upper cabinets maximize vertical storage for glassware.

Integrated finger pulls maintain uninterrupted cabinet lines, and open shelving provides dedicated display space for art and colorful barware.

Utility Cabinets

- Full-height pantry cabinetry maximizes vertical storage for oversized appliances, cleaning supplies, and mudroom overflow. A partial door split aligns with the consistent 36-inch countertop datum, creating strong horizontal alignment and maintaining proportional cabinet elevations throughout the space. Integrated finger pulls preserve the clean, streamlined millwork.
- The checkerboard treatment introduces a graphic counterpoint to the highly functional storage and carries the room's playful party spirit into its most utilitarian zone.

Beverage Fridges

- Beverage refrigerators are centrally positioned along the feature wall to anchor the self-serve bar station and support the adjacent prep zone.
- This placement consolidates beverage service, improves circulation, and keeps guests out of the primary work area during entertaining.
- Minimal white tab hardware visually recedes into the cabinetry, maintaining clean lines and allowing the boldly colored cabinet fronts to remain the dominant architectural element.

Display Areas

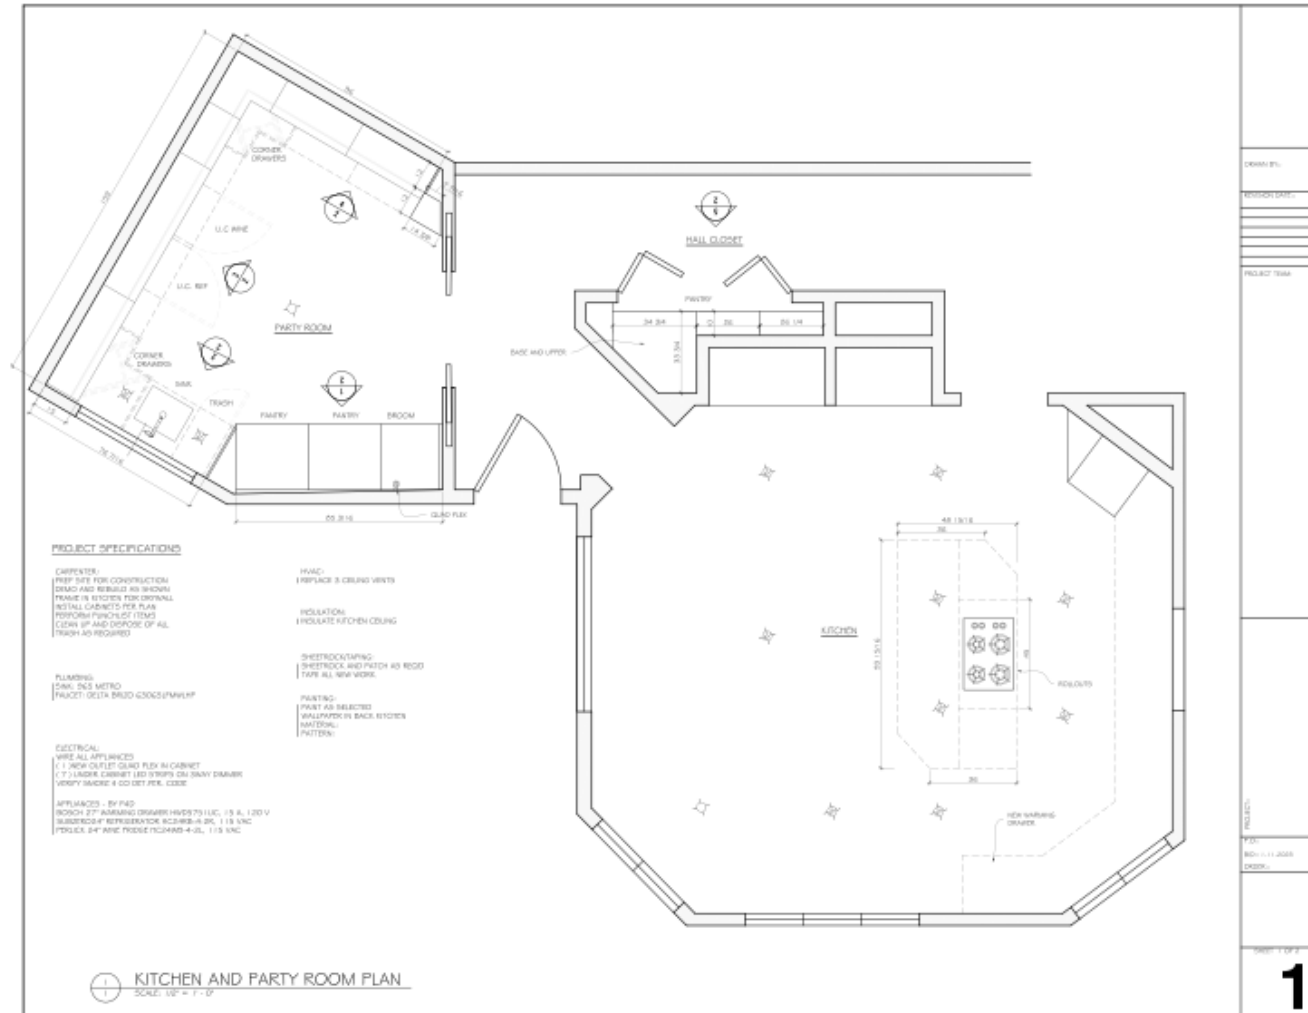

Floating shelves with integrated LED strip lighting provide dedicated illumination for the custom art display while maintaining a clean, streamlined profile.

Confetti-patterned vinyl wallcovering adds a durable, graphic layer that reinforces the room's energetic color palette.

White Corian countertops provide a seamless, low-maintenance work surface and visually quiet the bold cabinetry while introducing a subtle retro reference.

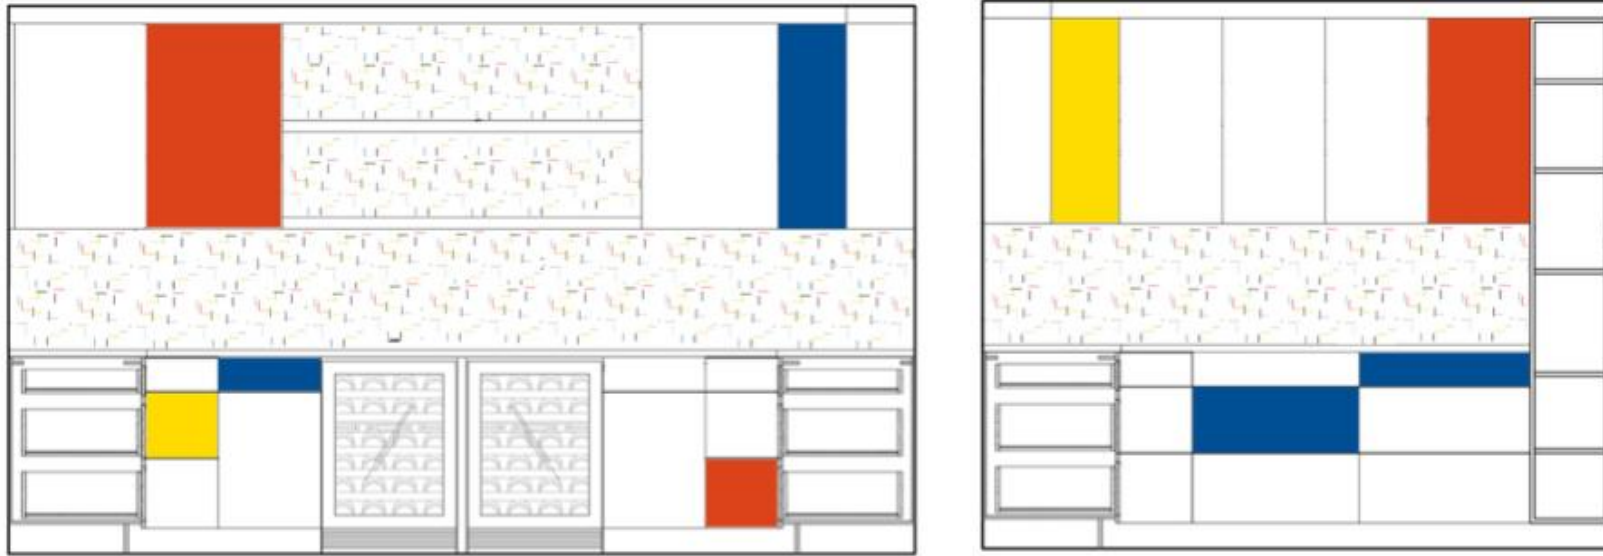

DRAWING 1

The main level laundry room is repurposed to the back kitchen/ party room for our entertaining clients. Located off the pool deck, ideal for summer family parties organized, maximized function
