2026 RoTY Awards

RESIDENTIAL BATH $70,000-$100,000

Client Needs

This old 1920s home has lots of charm, but the 2nd floor bathroom wasn’t quite in line with the rest of the house. The layout made the space feel small and worn out. The homeowners had a strong vision for the space that included both a tub and shower.

We reimagined the layout to give them modern conveniences like a vanity and separate shower, while keeping a tub in the space. Besides the luxurious handmade tile and fresh color palette, they also opted to go with in-floor hydronic heat. The thoughtful selections to the execution took this room from just another bathroom to an oasis they can turn to for relaxation and stress relief. The homeowners also put in some sweat equity by doing the painting and millwork installation themselves. It's not everyday you get to work with such talented clients.
