Complete Confidence in Regulated Material Management

Where Expertise Meets Innovation in
Regulated Material ManagementSM

Complete Material Lifecycle Management Changes Everything

GXP-Storage® integrates decades of regulated storage expertise with purpose-built infrastructure and validated systems to ensure end-to-end lifecycle support:

Expertise & Proven Results

Our leadership team has 100+ years of experience solving material management challenges from discovery through commercial distribution. Each leader brings deep domain expertise and an unwavering commitment to compliance excellence.

Purpose-Built Facilities

Our multi-site facilities offer millions of cubic feet of secure, access-controlled storage capacity, across controlled ambient to cryogenic conditions. We eliminate mid-project relocations and ensure material integrity.

Validated Systems for Visibility

GXP-Guardian® is the only validated system purpose-built for regulated material lifecycle management. Get complete control of your regulated material—real-time visibility, immutable compliance, and AI-driven intelligence in one secure, audit-ready system.

Responsive Managed Services

From onboarding to retrieval, our white-glove managed services streamline operations so your team spends more time on science and less on logistics.

One System. One Partner. Total Lifecycle Continuity.

Quality with Proven Results

Compliance isn't a checkbox. Our fully validated systems meet GAMP 5, 21 CFR Part 11, Annex 11, GLP, GCP, and cGMP standards, with ISO 9001:2015 and ISO 20387:2018 certifications providing quality operations and audit-ready documentation to ensure confidence at every step.

Every movement is tracked, and every record is defensible. We are built for inspections before they are scheduled.

Technology That Powers Compliance

GXP-Guardian, our proprietary AI-enabled platform, turns lifecycle data into actionable insights that help you plan smarter and move faster. It automates compliance, enables predictive planning, and delivers real-time visibility across your entire storage network.

This is not warehouse software with a layer of tech. It is a purpose-built engine for lifecycle control.

Lifecycle Continuity

Your storage strategy should not pause when your research advances. We provide uninterrupted continuity from discovery through commercialization, with no vendor switches, no revalidations, and no compromises.

One validated system connects every phase to reduce risk and accelerate progress—from tech transfer through commercial distribution.

Strategic Locations

Our facilities are strategically placed in major biotech hubs including Research Triangle Park in the US and the UK's Golden Triangle (Oxford-Cambridge-London corridor) to support short transit times and regional compliance. Whether you need support for clinical trials or rapid-response manufacturing, we keep your operations moving.

Location becomes a competitive edge.

Temperature-Controlled Capacity That Scales With You

Whether it's tissue samples, investigational products, or commercial retains, we have the infrastructure and protocols to preserve your material integrity across any storage environment.

We support your needs through every condition:

Controlled Ambient
21° C

Refrigerated
2° C to 8° C

Frozen
-20° C

Low
-30° C to -40° C

Ultra-Low
-80° C

Cryogenic
-150° C

Ready to Transform Your Regulated Material Management?

Start your journey to complete visibility, total control, and proven compliance.

ABOUT US

OUR NAME

Pronounced ki'-mah-noks, means **Ideal Knowledge Transfer[®]**, which ensures technical know-how is shared, scaled, and sustained across every team and every phase.

OUR APPROACH

Cross-functional collaboration with engineers, scientists, compliance & regulatory experts, PMs, and more.

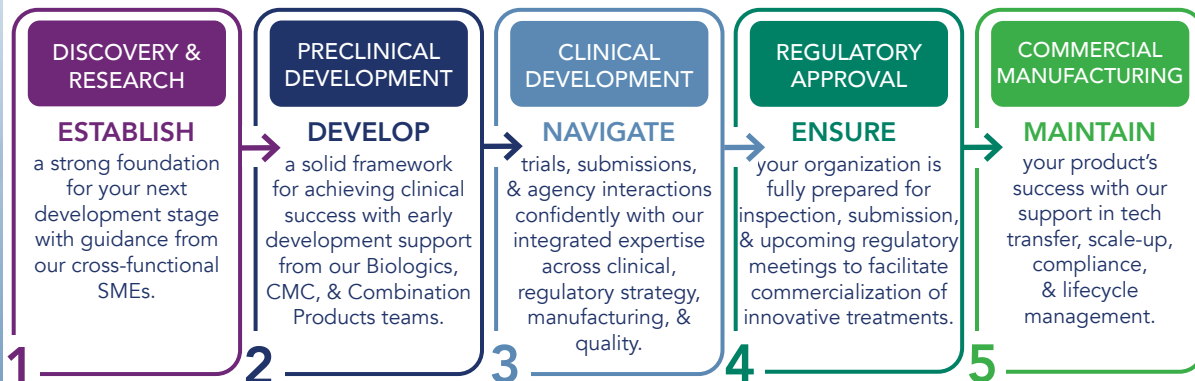

OUR EXPERTISE

Work exclusively in Life Sciences **for over 20 years**, supporting combination products, biotechnology, pharmaceuticals, and medical devices.

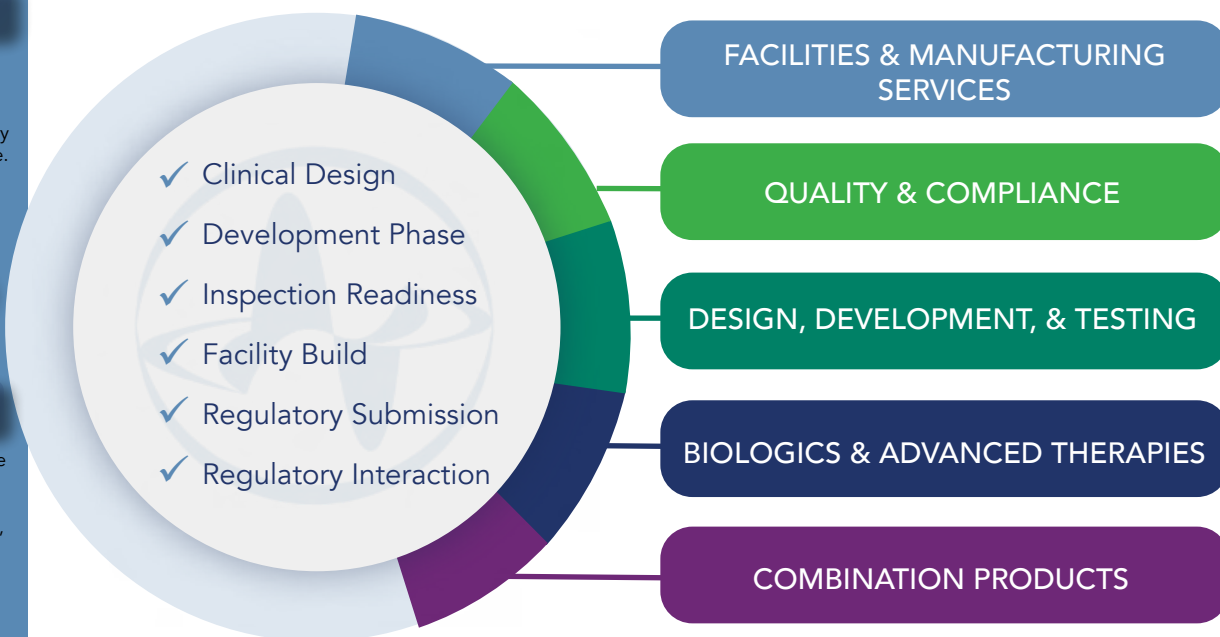

ONE SOURCE. EVERY STAGE.

Combination Products | Biotechnology | Pharmaceuticals | Medical Devices

FOCUS AREAS

Your Life Science Solution Partner for Your Next Milestone

**Advancing Life Science Innovation Through
Insightful Solutions and Collaboration**

HEALTH CARE & LIFE SCIENCES LAW

Health care and life sciences have been central to the work of Maynard Nexsen for more than 60 years. Today, our robust legal practice supports clients located throughout the Southeast and beyond with a team of attorneys dedicated to protecting health care providers.

Our attorneys are experienced in all areas of the law regarding the regulation, delivery, and financing of health care and life sciences services and products. We work with providers, practitioners, investors, scientists, manufacturers, suppliers, and vendors -- all who need the support of a knowledgeable legal team that understands the ever-changing regulatory environment that they work within.

Expansive health care and life sciences experience:

- Payor/patient/provider relationships and contracts
- False claims analysis and defense
- Health care fraud and abuse, investigations and litigation
- Alternative dispute resolution
- Physician/hospital dealings
- Stark/Anti-kickback laws
- Mergers, acquisitions and consolidations
- Survey and certification
- Employment law
- Relationships with pharmaceutical vendors
- Compliance due diligence
- Managed care issues
- Licensure and provider application assistance
- Professional disciplinary proceedings
- Medical staff/credentialing advice
- Requirements for prescribing opioid and controlled substances
- HIPAA privacy and security

Our clients span the life sciences spectrum including:

- Pharmaceutical
- Biopharmaceutical
- Medical Devices
- Drug Delivery
- Neurotech
- Diagnostic
- Bioagriculture
- Biotech
- Research Institutions

Learn more about Maynard Nexsen and our health care and life sciences law practice.

TAKING THE PULSE

A Health Care and Life Sciences Podcast

Taking The Pulse is dedicated to examining one of America's largest industry sectors, welcoming leaders in health care and life sciences to bring key issues to the forefront every week.

The health care and life sciences sectors are among the fastest growing and most complex industries in the world. On each episode of **Taking the Pulse: A Health Care and Life Sciences Podcast**, Maynard Nexsen attorneys Matthew Roberts and Lauren DeMoss, along with co-host Heather Matthews, take a current look at the forces shaping one of America's largest and most dynamic industry landscapes.

Pipette Calibration

Accurate results at the smallest measurement

- NIST-Traceable Calibration
- Preventative & Corrective Maintenance
- Parts & Repairs
- Mail-in and On-site Delivery Models

CAPITAL PROJECT SERVICES & CONSULTING

From project planning through operational readiness

CAPITAL PROJECT SERVICES

PCI combines expert project management, calibration, and instrument commissioning to ensure successful project delivery in regulated environments.

Key Capabilities

- Project Management Office (PMO)
- Data Engineering
- Technical Service Delivery
- Operational Readiness

Technical Service Delivery

Aligned delivery, data integrity, and system readiness

Core Support:

- Instrument Receipt Verification & Data Readiness
- Criticality & Sensor RISK Assessments
- Loop Checks & Automation Scaling/Integration
- Initial Calibration & Functional Testing
- Instrument Commissioning & Turnover Support

CONSULTING SERVICES

PCI helps organizations design, implement, and sustain compliant calibration and maintenance programs from R&D through commercial manufacturing.

Focus Areas:

- Program Governance & Oversight
- F&E Compliance
- Asset Program Management
- CMMS Implementation & Enhancement
- Continuous Improvement

Asset + Data Support

Lifecycle management, audit readiness, and strategic program alignment

Key Services:

- Embedded asset program support and staff augmentation
- Vendor, planner/scheduler, and work order oversight
- CMMS administration, upgrades, implementation, and validation support
- Data migration, modeling, reporting, and compliance remediation
- Criticality, tolerance, and program effectiveness assessments
- Policy, procedure, and gap analysis support

Single-source partner across calibration, capital projects, and consulting

PRESERVING YESTERDAY,
INCUBATING TOMORROW

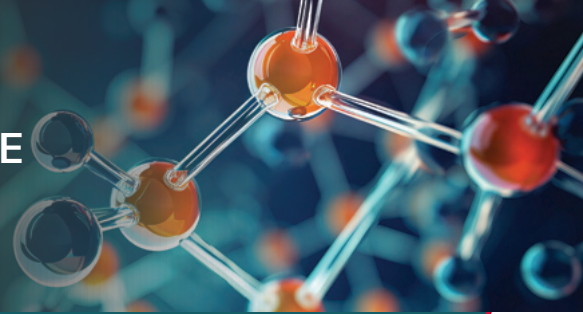

Built for reliability, so you can focus on discovery

Help protect high-value samples, maintain compliance, and reduce downtime with reliable lab equipment solutions. Covering **preservation**, **cultivation**, and **cell analysis**, PHCbi helps safeguard your entire workflow, so you can stay focused on the science.

**Ready to see how PHCbi's solutions
can support your workflow?**

HELPING LIFE SCIENCES COMPANIES ACHIEVE MILESTONES WORLDWIDE

Today's life sciences industry is dynamic and global, and its challenges require innovative solutions. Smith Anderson's life sciences group helps pharmaceutical, biotech, medical device, and pharmaceutical services companies navigate these challenges with practical, business-focused legal advice. Strategically based in a leading international hub for life sciences, the Research Triangle Region of North Carolina, we advise industry participants across the U.S. and worldwide, from startups to multi-national companies. Drawing on decades of industry experience, we help our clients advance their business objectives across the company and product lifecycle, from formation and financing through R&D and clinical development to commercialization, and when assessing and executing strategic transactions.

Whether you're still developing your products or services, looking for collaborators, working with financing sources, or positioning your company or products for acquisition, we provide incisive, strategic advice that's grounded in your goals and your industry.

National Recognition.
Focused Partner Attention.
Client-Centered Culture.
