**GUARDIAN SOFTWARE SYSTEMS ANNOUNCES NEW
PRODUCT DEVELOPMENT SPECIALIST**

Ben Davis named Product Development Specialist

Oconomowoc, Wis. – Guardian Software Systems, a metal casting ERP and MES software provider, announced today the appointment of Ben Davis as Product Development Specialist.

“Ben returns to the Guardian family after working with us previously as a consultant,” said Steve Hoppe, CEO of Guardian Software Systems. “We are pleased to bring back his experience and excited to implement his new ideas to better our product for our clients.”

As a Product Development Specialist, Davis is responsible for developing and adding new technologies to the Guardian ERP and MES software for the clients of Guardian Software Systems.

“I am super excited to be back working with Guardian in a full-time role after previously being a part of the team in a consultancy role,” said Davis. “The Guardian ERP and MES solution is an industry-leading solution for the foundry, and I look forward to creating new apps and features for our customers.”

Davis graduated from the University of Middle Tennessee with a degree in Computer Science. Before Guardian, Davis had product development roles with QSR Automations, Centare and ProShip Software.

About Guardian Software Systems

Guardian Software Systems is a privately held software and services organization. With customizable offerings that meet the unique needs of organizations in the metal casting industry throughout the entire production chain. Guardian’s ERP and MES software bring the front office and shop floor together. Backed by 30 years of metal casting industry expertise and first-hand experience in over 250 foundries around the world, the Guardian Solution provides organizations with a comprehensive view of their business – arming them with the data and visibility to optimize operations, grow beyond existing KPIs and beat the competition.
