

UNITED STATES INTERNATIONAL TRADE COMMISSION

WASHINGTON, DC 20436

January 26, 2024

SUBJECT: Information About Upcoming Mandatory U.S. International Trade Commission Greenhouse Gas Emissions Intensities Questionnaire

Dear Sir or Madam,

The U.S. International Trade Commission (USITC or Commission), an independent, nonpartisan, federal agency, is undertaking a new factfinding investigation, *Greenhouse Gas Emissions Intensities of the U.S. Steel and Aluminum Industries at the Product Level*, Inv. No. 332-598, at the request of the U.S. Trade Representative (USTR) in order to inform discussions regarding the Global Arrangement on Sustainable Steel and Aluminum. As part of its investigation, the Commission will conduct a survey by issuing questionnaires to all facilities, whether U.S. or foreign owned, that produced certain steel and aluminum products ("covered products") in the United States in 2022. This questionnaire will collect data on the production of these covered products and information that will be used to calculate their associated greenhouse gas emissions. Data from questionnaire responses, in combination with other sources, will then be used to produce national-level estimates of emissions intensities of covered products at the product category level. Your company has been identified as a company with at least one facility that produced covered products in 2022. **Your participation in this survey is mandatory (19 U.S.C. § 1333(a)).**

The Commission will designate the information you provide in response to the questionnaire as "confidential business information," unless such information is otherwise available to the public. The Commission will aggregate the information you provide with information from other questionnaire responses, but it will not publish information obtained from your questionnaire or an aggregation of your responses and other questionnaire responses in a manner that would identify your company/facility or reveal the operations of your company/facility.

The survey will be conducted in two parts. First, you will receive access to a company-level questionnaire to complete, which asks for a point of contact for each facility your company owns that produced covered products in 2022. Then, the facility contacts identified in your response to the company-level questionnaire will receive access to facility-level questionnaires to complete for their respective facilities. The company-level questionnaire will be mailed to you in late March or early April

2024, and facility-level responses will be due 60 days from the time when the company-level questionnaire was mailed to your company.

Please review the list of covered steel and aluminum products at this link:

<https://www.usitc.gov/saemissions> to confirm that your company produced any of these covered products in 2022. Note that facility-level questionnaire data will not be collected for distributors or fabricators of non-covered downstream products.

- **If none of your facilities produced any of the covered products in 2022, please contact us so that your company can be exempted from this mandatory survey.**
- **If your company produced any of the covered products in 2022, we ask that you confirm that you are the correct contact for the company's questionnaire or provide a new contact and an e-mail address for this contact.**

The Commission will send a link to the questionnaire and a token by e-mail and by mail to you or the contact you provide. You can confirm or update your contact information, or request an exemption, by e-mailing us at sa.emissions@usitc.gov.

As requested by the USTR, the Commission will deliver the report containing the product category-level emissions intensity estimates no later than January 28, 2025. Additional information on the survey, covered products, and the specifics of USTR's request are available on the investigation website: <https://www.usitc.gov/saemissions>.

If you have any questions or concerns about information provided in this letter, please contact one of the project leaders—Caroline Peters, Shova KC, Alex Melton, and Kristin Smyth—by email at sa.emissions@usitc.gov or by phone at 202-780-0230.

Thank you in advance for your assistance with this important investigation.

Sincerely,

Robert Carr
Acting Director, Office of Industry and Competitiveness Analysis
U.S. International Trade Commission
