

LEARN THE PLAN, STAY FOR THE MIXER!

Join us for an engaging evening learning and connecting at our upcoming Professional Women in Building event. We'll begin with a special educational session featuring Walk Your Plans, where we'll explore how this innovative technology allows builders, designers, and clients to step inside a home before it's built and experience the layout in real scale. After the presentation, stay for our networking mixer—an opportunity to connect, collaborate, and build relationships with fellow professionals in our industry.
