Intro to Trello Mini-Course

Each video is 5-8 minutes long.

Why Trello?

We need a uniform method for students to turn in homework and have chosen to use the free Trello software. Since Trello may be new to you, we've put together a set of short instructional videos we encourage you to watch prior to the first class.

Explore

After you create your free account, the easiest way to learn Trello is simply to play around with it. Pick a small personal or work project (besides Inventory Management) and try organizing it with Trello.

Inventory Management Template Board

We will be providing you with a template Inventory Management board that you will make a copy of as part of Week 1's course homework. Please do not try to set up your Inventory Management board in advance.

Trello Support

If you know you have difficulty learning new technology or if in the course of your Week 1 homework you find Trello unintuitive or maddening, please reach out to the dean as soon as possible for a 1:1 interactive lesson by scheduling at https://calendly.com/jillhendrix/discovery.
You will not be bothering her, we promise –– she loves sharing her own love for Trello.
