

WATER & CROSS CONNECTION TRAINING

FREE CROSS CONNECTION CONTROL CEU TRAINING

Thursday, October 16, 2025 | Kanarrville City

0.6 Water & Cross Connection CEU | Hybrid Training

TIME	AGENDA ITEM
9-10:30 AM	Five Elements of Cross Connection <i>Chris Bowles, DDW</i> Join the Utah Division of Drinking Water (DDW) for an in-depth exploration of the five essential elements of a compliant cross connection control program. This session will break down the program components—legal authority, public awareness, trained personnel, recordkeeping, and ongoing enforcement. Through real-world examples, interactive discussion, and insights into Utah's certification and compliance processes, attendees will gain practical guidance on designing, implementing, and maintaining a robust cross connection control program tailored to their system's needs.
10:30 AM-12:00 PM	Common Problems in CCC <i>Kelsey Johnson, RWAU</i> Common Problems in Cross Connection Control Kelsey Johnson, RWAU Landscape irrigation is one of the most common culprits of cross connection, and water systems need to be prepared for the influx of hazard assessments and test reports coming in. We will discuss the highlights of landscape backflows, dual source connections, and managing backflow testers during this busy season..
12-1 PM	LUNCH (on your own)
1-2:30 PM	Plumbing Code and Chem Dispensers <i>Chris Bowles, DDW</i> This session will review plumbing code updates from 2018 and 2021 that affect Cross Connection Controls. Some topics included will be dual source connections and chemical dispensers.
2:30-4 PM	Hazard Assessments <i>Tom McOmie, DDW</i> This presentation will give the attendee guidance to prepare for cross connection hazard assessments in their water systems. We will discuss the training required, the tools and equipment to bring on a survey, and develop strategies of prioritizing and assessing the facilities within your water system. We will also discuss forms and other methods of record keeping.
