

# WATER & CROSS CONNECTION TRAINING

## FREE CROSS CONNECTION CONTROL CEU TRAINING

*Tuesday, June 17, 2025 | Grantsville City*

0.6 Water & Cross Connection CEU | Hybrid Training

TIME	AGENDA ITEM
9-10:30 AM	<b>Backflow Software</b>   <i>Andy Rubin, HydroCorp</i> Hydro Corp is a software company specializing in cross connection control. Andy will share how this software and other options can help operators organize their files, stay on top of notifications, and maintain an effective program.
10:30 AM-12:00 PM	<b>Spring Testing</b>   <i>Kelsey Johnson, RWAU</i> Spring is knocking on our door, are you ready? Landscape irrigation is one of the most common culprits of cross connection, and water systems need to be prepared for the influx of hazard assessments and test reports coming in. We will discuss the highlights of landscape backflows, dual source connections, and managing backflow testers during this busy season.
12-1 PM	<b>LUNCH (on your own)</b>
1-2:30 PM	<b>Hazard Assessments</b>   <i>Paul Fulgham, RWAU Board</i> This presentation will give the attendee guidance to prepare for cross connection hazard assessments in their water systems. We will discuss the training required, the tools and equipment to bring on a survey, and develop strategies of prioritizing and assessing the facilities within your water system. We will also discuss forms and other methods of record keeping.
2:30-4 PM	<b>Interview with a System</b>   <i>Brett Palmer, Stansbury Park ID</i> A RWAU staff member will interview a Utah water system about their Cross Connection Control Program. This water system will also be taking questions from the audience, discussing different ways to set up Cross Connection Programs, and troubleshooting.
