FOR IMMEDIATE RELEASE

SBCRI Seeks Member for Newly Created Board

IRVING, TX – May 13, 2025 – The Structural Building Components Association (SBCA) and SBCRI are seeking a qualified candidate to fill an open position on the SBCRI Board, an independent board intended to oversee SBCRI's Quality Assurance Program and act as the board of review for any decertification appeals filed with SBCRI.

The ideal candidate must not be currently employed within the component manufacturing or adjacent industries but should possess strong working knowledge of ANSI/TPI 1, component manufacturing processes, and/or accreditation processes. The board member must be able to participate in a few meetings each year, either virtually or in person.

The three-member Board is composed of professionals with deep technical expertise in metal plate connected wood trusses and building components. SBCRI Board members must be fully independent from any commercial or financial interests related to component manufacturing. They may not be affiliated with companies that manufacture metal connector plates, metal plate connected wood trusses, structural lumber, manufactured lumber (e.g., LVL, PSL), or truss design services, nor be an owner, officer, or employee of a metal plate connected truss design firm.

Eligible candidates may include professional engineers, wood technologists/scientists, former regulatory officials from one of the model building codes or state mandated building code agencies, academicians with experience working with structural building components, or former owners or executives of a business that was previously involved in the manufacturing of building components.

This is a meaningful opportunity to serve the component industry and help maintain a high level of quality.

To express your interest or to learn more, please fill out the following form: [SBCRI Board Member Interest Form](#) or contact Jess Lohse at jess@sbccomponents.com.

About SBCRI

SBCRI, the Structural Building Components Research Institute, is an ISO/IEC 17020 (third party inspection) accredited organization that performs quality assurance inspections primarily for component manufacturers. It is accredited to inspect wood trusses, steel trusses, wood wall panels, and steel wall panels. Learn more at <https://sbcri.info/>.

About SBCA

The Structural Building Components Association (SBCA) is a trade association representing manufacturers of structural building components. Its membership also includes truss plate suppliers, original equipment manufacturers and resellers, computer software companies, lumber suppliers, builders, and professional individuals in various fields, including engineering, marketing, and management. SBCA provides services its membership needs to continue expanding the market share of all structural building components by promoting the common interests of those engaged in manufacturing trusses, wall panels, and related structural components; to ensure growth, continuity, and increased professionalism, which will strengthen the structural building component manufacturing industry's influence.
