FOR IMMEDIATE RELEASE

SBCA Announces 2026 European Industry Tour

IRVING, TX – July 1, 2025 – The Structural Building Components Association (SBCA) is excited to announce the return of its highly regarded European Tour in 2026, offering a unique opportunity to explore international offsite construction practices, gain global perspective, and build lasting industry relationships. Building on the momentum of the 2024 tour, the 2026 itinerary spans April 12-24, 2026, and includes stops in Finland, Sweden, Denmark, Germany, Ireland, Scotland, and the Netherlands.

Designed with flexibility in mind, participants can attend the full 12-day experience or mix and match tour segments to best align with their schedules and business goals. The tour begins in Helsinki, Finland, and concludes the first leg in Denmark. The second leg kicks off in Munich on April 19th and continues through Ireland, with stops in Scotland and the Netherlands. Throughout the journey, attendees will benefit from a blend of cultural experiences, facility tours, educational tours, and networking opportunities that not only provide an expanded understanding of this industry but also foster professional growth and meaningful connections.

“Anyone who is interested in learning more or broadening their perspective on the components industry should definitely make the trip.” – Justin Richardson of Richco Structures, a 2024 SBCA European Tour participant.

“Whether it was to gain perspective, learn more about the broader industry, or learn about the technology and innovation, everyone who went stated that they would do another international offsite tour and would encourage others to do the same.” – [*An Invaluable Experience \(SBCA Magazine, July/August 2024 Issue\)*](#)

Those interested in learning more or indicating preliminary interest are encouraged to [fill out this form](#). Registration will officially open on **September 1, 2025**.

About SBCA

The Structural Building Components Association (SBCA) is a trade association representing manufacturers of structural building components. Its membership also includes truss plate suppliers, original equipment manufacturers and resellers, computer software companies, lumber suppliers, builders, and professional individuals in various fields, including engineering, marketing, and management. SBCA provides services its membership needs to continue expanding the market share of all structural building components by promoting the common interests of those engaged in manufacturing trusses, wall panels, and related structural components; to ensure growth, continuity, and increased professionalism, which will strengthen the structural building component manufacturing industry's influence.
