

What Do You Mean The Paver Is Down?

- Conveyor Chains/Bearings/Sprockets
- Pump Drive Gear Box
- Conveyor Drive Chains & Rear Wheel Planetaries
- Generator/Hydraulic Filter
- DEF Tank Header/Sending Unit

Slat Bars, Bolt Size, Guard Thickness, All Plates

Center Guard Covering Chains

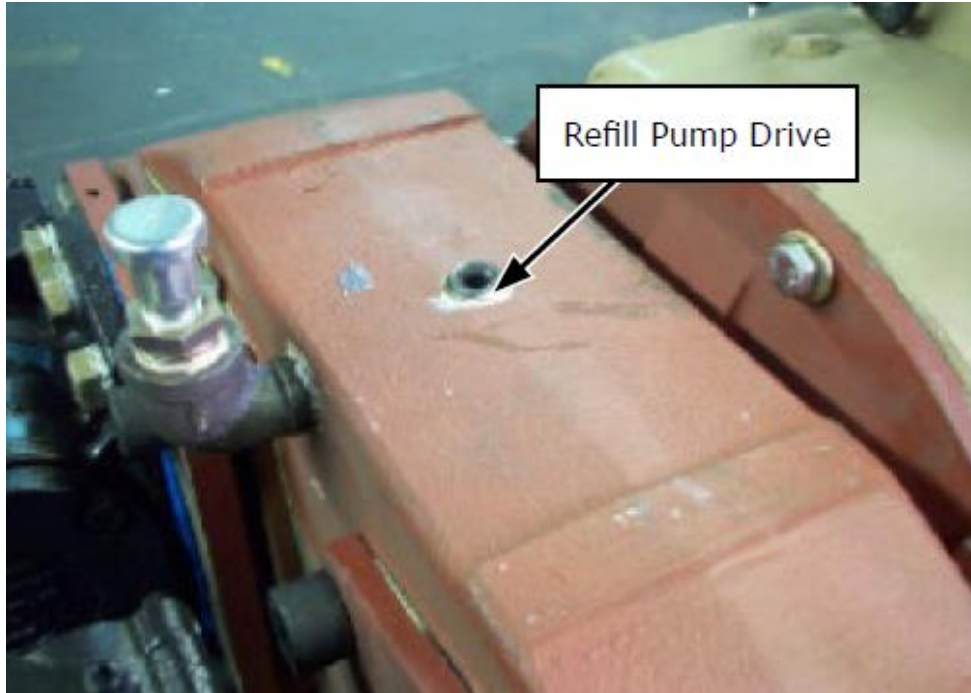

Guards Exposing Chains

90% of failures result from lack of maintenance

Chain Pin Head Worn-Sprocket teeth

Enforce OEM intervals-Check Plugs

Use of Hydra Heat Kote
Heat Transfer Compound

Front Bogie Wheels

From a distance stand back view wheel. If wheel is leaning in the spindle bearing is worn.

Make Sure Tow-Arm Holes are Equal

Pins, Bushings, Tie-Rod

Eliminate Corrosion on Plugs

- Keep your Screed Clean of Debris-Plastic Bottles, Cans, Food Wrapper.
- Adjust Conveyor Chains every 250 hrs.
- Always keep the Screed off the ground after every use.
- Maintain recommended Tire Pressure on Drive Wheels.
- Inspect Screed Plates & Extension
- Keep Front Push Rollers Periodically.
- Asphalt Build-Up behind Drive Tires & Tracks.
- Battery Cables & Safety Lock-out.
- Park Brake & E-Stops.
