

08:59:54 From Lauren Rachuba (SHLB) to Host and Panelists:

Hi Christine and Ovidiu! We will begin soon. We can hear you but we are muted

09:01:35 From Ovidiu Viorica – NM Office of Broadband / PSFA to Lauren Rachuba (SHLB)(Direct Message):

Thank you Lauren, and sorry again for yesterday...

09:03:31 From Kristen Engebretsen to Everyone:

Thank you for joining our hybrid symposium. We will have speakers and attendees both in-person and on Zoom.

09:03:49 From Kristen Engebretsen to Everyone:

We are grateful to HWG for hosting us in their "Zoom Room." We chose this format to allow increased participation virtually. In order to facilitate this hybrid model, we have a few guidelines for virtual participation:

09:04:05 From Kristen Engebretsen to Everyone:

1) Please use the chat function to interact with the other participants.

2) Please use the Q&A function to ask a question of the panelists.

3) You can upvote other questions by clicking the thumbs up button. This will help us see which questions are rising to the top in terms of relevancy for the group.

4) SHLB staff will be monitoring the Q&A and selecting questions from virtual attendees to ask of the panelists during the Q&A period.

5) If you are in-person at the event, please be aware that the entire room is mic'd from every direction. Those online will hear every word spoken from in-person attendees.

09:23:48 From dawn gallagher to Everyone:

How can a government (say, county government) get details on pole locations? Can a county contact utility companies to get the info?

09:25:42 From Christine Hallquist to Lauren Rachuba (SHLB)(Direct Message):

Larger utilities have their pole information in a GIS database. Small municipals (less than 20K consumers) may not.

09:27:08 From Christine Hallquist to Lauren Rachuba (SHLB)(Direct Message):

In the state of Vermont, the data bases are available as public record through Vermont Center for Geographic Information – <https://vcgi.vermont.gov/>

09:29:08 From Christine Hallquist to Lauren Rachuba (SHLB)(Direct Message):

I guess I do not have the ability to respond to everyone.

10:00:09 From Kim Gaffney Corriher to Everyone:

Can Evan speak more to how and how quickly the pole make ready process will be streamlined? Are there specific action steps that are being used that can be shared with the states as guidance?

10:01:43 From Chris Kramer to Host and Panelists:

Any thoughts on what the Commonwealth of Kentucky did with

grant amounts of \$ 5,000 per pole replaced as outlined by Jonathan Chambers in his Co-Ops Connect article of June 7th 2024

10:02:53 From Kristen Engebretsen to Everyone:

Muting during the transition phase so virtual attendees don't get the room noise.

10:04:40 From Kristen Engebretsen to Everyone:

We'll be starting our state official panel shortly, and bringing in some of our virtual panelists!

10:07:44 From Christine Hallquist to Lauren Rachuba (SHLB)(Direct Message):

I cannot turn on my camera.

10:07:53 From Christine Hallquist to Lauren Rachuba (SHLB)(Direct Message):

The host has disabled it.

10:29:46 From Alice Lawson to Everyone:

Clarifying question for Rep Linville. Is the "\$25 per pole" cap an annual RENT cap (vs. the \$30K per pole is a BUILD cost)?

10:31:23 From Lauren Rachuba (SHLB) to Host and Panelists:

Please share your slides!

10:40:04 From Kristen Engebretsen to Host and Panelists:

Ovidiu, we're having trouble hearing you.

10:41:52 From Ovidiu Viorica - NM Office of Broadband / PSFA to Host and Panelists:

Sorry about the interruption....

10:45:41 From Christine Hallquist to Host and Panelists:

Please share in the general chat (I do not have access)

"(b) "Unusable space" shall mean the 6 feet buried in the ground plus the first 18

feet above ground and below the first attachment, unless the Pole-Ownning

Utility has conducted a study of the actual average amount buried or the

clearance above ground below the first attachment.

(c) Otherwise, total usable space shall be 16 feet, which is based upon a

presumed pole height of 40 feet, less 24 feet presumed unusable space"

10:53:19 From Jeff Holtmann to Everyone:

Who Pays MR cost for the space required for the 5g Antenna?

10:53:53 From Christine Hallquist to Host and Panelists:

I wonder what MR stands for?

10:54:27 From Ovidiu Viorica - NM Office of Broadband / PSFA to Host and Panelists:

Is MR the Monthly Recurring Cost (or rent coast)?

10:54:49 From Christine Hallquist to Host and Panelists:

Thank you.

10:55:21 From Kristen Engebretsen to Everyone:

Muting for the break. Please standby for our final panel of the event!

10:55:22 From Lauren Rachuba (SHLB) to Everyone:

From Christine: "(b) "Unusable space" shall mean the 6 feet buried in the ground plus the first 18

feet above ground and below the first attachment, unless the Pole-owning

Utility has conducted a study of the actual average amount buried or the

clearance above ground below the first attachment.

(c) Otherwise, total usable space shall be 16 feet, which is based upon a

presumed pole height of 40 feet, less 24 feet presumed unusable space"

11:02:56 From Kristen Engebretsen to Everyone:

Welcoming our stakeholder panel to round out our line up of experts.

11:04:50 From Corian Zacher (they/them) | Next Century Cities to Host and Panelists:

Slides: <https://nextcenturycities.org/wp-content/uploads/2021/05/2024.06.13-SHLB-Poles-Symposium-NCC-Slides.pdf>

11:06:57 From Ryan Johnston to Everyone:

Link to Corian's Slides:

<https://docs.google.com/presentation/d/1uxE5S8nKPGScrrBfbVz5jrFzLyU6kzQjJDb4p0GkzF8/edit?usp=sharing>

11:49:07 From Alice Lawson to Host and Panelists:

Kristen, I'm still see the Incompas "Thank You" slide. Is that correct?

11:49:55 From Alice Lawson to Host and Panelists:

Thanks - can now see the new slides!

11:59:36 From Corian Zacher (they/them) | Next Century Cities to Host and Panelists:

Great job everyone! Thanks for having me for this important conversation.
