

Clinical Biomechanics of the Spine

Second Edition

Augustus A. White III
Manohar M. Panjabi

J. B. Lippincott Company

Second Edition

Clinical Biomechanics of the Spine

Augustus A. White III, MD, DMed Sci

Professor of Orthopedic Surgery
Harvard Medical School;
Orthopedic Surgeon-in-Chief
Beth Israel Hospital
Boston, Massachusetts

Manohar M. Panjabi, PhD, DTech

Professor of Orthopedics and Rehabilitation,
and Mechanical Engineering
Director of Biomechanics Research
Yale University School of Medicine
New Haven, Connecticut

J.B. LIPPINCOTT COMPANY

Philadelphia

Grand Rapids New York St. Louis San Francisco
London Sydney Tokyo

Acquisitions Editor: Darlene Barela Cooke
Developmental Editor: Delois Patterson
Copy Editor: Gail Turner
Project Editor: Kathy Crown
Editorial Assistant: Elizabeth Durand
Indexer: Sandra King
Design Coordinator: Ellen C. Dawson
Cover and Interior Designer: Ellen C. Dawson
Production Manager: Caren Erlichman
Production Coordinator: Kevin Johnson
Compositor: Circle Graphics
Text Printer/Binder: Murray Printing Company

White, Augustus A.

Clinical biomechanics of the spine / Augustus A. White III,
Manohar M. Panjabi.—2nd ed.

p. cm.

Includes bibliographical references.

ISBN 0-397-50720-8

1. Spine—Abnormalities. 2. Spine—Wounds and injuries.
3. Pain—Treatment. 4. Spine—Surgery. 5. Spine—Mechanical
properties. 6. Backache. I. Panjabi, Manohar M. II. Title.

The authors and publisher have exerted every effort to ensure that the materials set forth in this text are in accord with current recommendations and practice at the time of publication. However, in view of ongoing research, changes in government regulations, and the constant flow of information relating to drug therapy, drug reactions, and spinal implants and devices, the reader is urged to check the package insert or manufacturer's brochure or statement for changes and for added warnings and precaution.

Contents

1

Physical Properties and Functional Biomechanics of the Spine ■ 1

Manohar M. Panjabi and Augustus A. White III

- 3 ■ Intervertebral Disc
- 19 ■ Spinal Ligaments
- 28 ■ The Vertebra
- 45 ■ Functional and Multisegmental Spinal Unit
- 55 ■ Mathematical Models
- 56 ■ The Rib Cage
- 58 ■ Spinal Muscles
- 67 ■ The Spinal Cord
- 71 ■ Nerve Roots
- 74 ■ *Clinical Biomechanics*
- 76 ■ *Notes*

2

Kinematics of the Spine ■ 85

Augustus A. White III and Manohar M. Panjabi

- 86 ■ Terms and Definitions
- 90 ■ Kinetics and Muscle Activity
- 92 ■ The Occipital-Atlanto-Axial Complex (C0-C1-C2)
- 97 ■ The Middle and Lower Cervical Spine (C2-T1)
- 102 ■ The Thoracic Spine
- 106 ■ The Lumbar Spine
- 112 ■ The Sacroiliac Region
- 115 ■ Comparison of Regional Characteristics and Variations
- 118 ■ Age, Sex, and Spine Kinematics
- 119 ■ Disease and Spine Kinematics
- 120 ■ *Clinical Biomechanics*
- 121 ■ *Notes*

3

Practical Biomechanics of Scoliosis and Kyphosis ■ 127

Augustus A. White III and Manohar M. Panjabi

- 128 ■ **PART 1: SCOLIOSIS**
- 128 ■ Anatomic Considerations
- 128 ■ Normal Kinematics
- 130 ■ Biomechanical Definition of Scoliosis
- 131 ■ Etiologic Considerations
- 136 ■ Biomechanical Considerations Involved in Prognosis
- 138 ■ Prevention
- 138 ■ Biomechanical Considerations Involved in Treatment
- 145 ■ Mechanics of Different Treatment Methods
- 155 ■ Conclusions

- 155 ■ **PART 2: KYPHOSIS**
- 155 ■ Anatomic Considerations
- 156 ■ Biomechanical Definition of Thoracic Kyphosis
- 156 ■ Etiologic Considerations
- 158 ■ Prognosis
- 160 ■ Treatment of Thoracic Kyphosis
- 162 ■ Spine Deformities—Traditional and Future

- 163 ■ *Clinical Biomechanics*
- 163 ■ *Notes*

4

Practical Biomechanics of Spine Trauma ■ 169

Augustus A. White III and Manohar M. Panjabi

- 170 ■ General Clinical Considerations
- 170 ■ Mechanism of Injury
- 172 ■ Update of Research Studies of Spine Trauma
- 183 ■ Summary and Conclusions
- 184 ■ Some Cogent Studies of Spinal Cord Trauma
- 189 ■ A Systematic Approach to Analysis of Mechanism of Injury and
Classification of Spine Trauma
- 192 ■ Review of Some Specific Cervical Spine Injuries
- 224 ■ Flexion Injuries
- 227 ■ Acute Post-Traumatic Cervical Disc Herniation
- 229 ■ Extension Injuries
- 242 ■ Clay Shoveler's Fracture
- 244 ■ Review of Some Specific Thoracic and Lumbar Spine Injuries
- 258 ■ Review of Special Injuries to the Spine

- 265 ■ *Clinical Biomechanics*
- 267 ■ *Notes*

5

The Problem of Clinical Instability in the Human Spine: A Systematic Approach ■ 277

Augustus A. White III and Manohar M. Panjabi

- 278 ■ Introduction
- 283 ■ **PART 1: OCCIPITAL-ATLANTO-AXIAL COMPLEX (C0-C1-C2)**
- 283 ■ Occipital-Atlantal Joint (C0-C1)
- 283 ■ Biomechanical Factors
- 285 ■ Clinical Considerations
- 287 ■ Atlanto-Axial Joint (C1-C2)
- 287 ■ Anatomic Considerations
- 292 ■ Biomechanical Factors
- 293 ■ Clinical Considerations
- 302 ■ Recommended Evaluation System
- 302 ■ Recommended Management
- 302 ■ **PART 2: THE MIDDLE AND LOWER CERVICAL SPINE (C2-T1)**
- 303 ■ Anatomic Considerations
- 303 ■ Biomechanical Factors
- 304 ■ Clinical Considerations
- 309 ■ Treatment Considerations
- 314 ■ Recommended Evaluation System
- 323 ■ Twelve Significant Signs of Cervical Spine Trauma
- 324 ■ Recommended Management
- 327 ■ **PART 3: THE THORACIC SPINE (T1-T10) AND
THE THORACOLUMBAR SPINE (T11-L1)**
- 328 ■ Anatomic Considerations
- 329 ■ Biomechanical Factors
- 330 ■ Clinical Considerations
- 333 ■ Treatment Considerations
- 338 ■ Recommended Evaluation System
- 339 ■ Recommended Management
- 342 ■ **PART 4: THE LUMBAR AND LUMBOSACRAL SPINE (L1-S1)**
- 342 ■ Anatomic Considerations
- 345 ■ Biomechanical Factors
- 349 ■ Spinal Stenosis and Instability
- 349 ■ Spondylolysis, Spondylolisthesis, and Instability
- 351 ■ Treatment Considerations
- 351 ■ Recommended Evaluation System
- 360 ■ Recommended Management
- 362 ■ **Part 5: THE SACROILIAC JOINT AND PUBIS**
- 362 ■ Anatomic Considerations
- 362 ■ Biomechanical Factors
- 364 ■ Clinical Considerations
- 365 ■ Recommended Evaluation System

- 366 ■ **PART 6: SOME THEORETICAL CONSIDERATIONS ON
THE BIOMECHANICS OF INSTABILITY**
- 366 ■ Displacement
- 366 ■ Ligaments and Stability
- 368 ■ Displacement and Cord Encroachment
- 369 ■ Conclusion
- 370 ■ *Clinical Biomechanics*
- 373 ■ Notes

6

The Clinical Biomechanics of Spine Pain ■ 379

Augustus A. White III and Manohar M. Panjabi

- 380 ■ Etiologic Considerations
- 407 ■ Diagnostic Considerations
- 422 ■ Treatment of Spine Pain
- 454 ■ Prophylaxis and Ergonomics
- 462 ■ *Clinical Biomechanics*
- 465 ■ Notes

7

Spinal Braces: Functional Analysis and Clinical Applications ■ 475

Augustus A. White III and Manohar M. Panjabi

- 476 ■ Historical Background
- 477 ■ Functions of Spinal Orthoses
- 478 ■ Biomechanical Factors
- 483 ■ Clinical Review of Spine Regions and Their Specific Orthoses
- 504 ■ Conclusion
- 506 ■ *Clinical Biomechanics*
- 507 ■ Notes

8

Biomechanical Considerations in Surgical Management of the Spine ■ 511

Augustus A. White III and Manohar M. Panjabi

- 512 ■ **PART 1: SURGICAL DECOMPRESSIONS**
- 514 ■ Decompression in the Cervical Region
- 524 ■ Decompression in the Thoracic Region
- 525 ■ Decompression in the Lumbar Region
- 527 ■ Guidelines for Selecting a Surgical Procedure

- 528 ■ **PART 2: SPINE FUSIONS**
- 528 ■ Clinical Biomechanics of Spine Fusion
- 541 ■ Evaluation of Constructs in the Occipitocervical Region
- 542 ■ Evaluation of Surgical Constructs in the Upper Cervical Spine
- 547 ■ Evaluation of Surgical Constructs in the Middle and Lower Cervical Spine
- 558 ■ Evaluation of Surgical Constructs in the Thoracic Spine
- 559 ■ Evaluation of Surgical Constructs in the Lumbar and Sacral Spine
- 565 ■ Spinal Fusions in the Management of Primary and Metastatic Tumors
- 568 ■ Some Guidelines on the Biomechanics of Postoperative Management of Patients Undergoing Spinal Fusions

- 570 ■ **PART 3: SURGICAL CONSTRUCTS EMPLOYING METHYLMETHACRYLATE**
- 570 ■ Biomechanical Factors
- 574 ■ Principles and Indications for the Use of Methylmethacrylate
- 574 ■ Analysis of Some Specific Constructs

- 579 ■ **PART 4: BIOMECHANICAL CONSIDERATIONS IN THE ART AND SCIENCE OF SPINE INSTRUMENTATION**
- 580 ■ Wires, Mesh, and Screws
- 582 ■ Spinal Implants
- 587 ■ Cervical Spine Implants: C0–C7
- 589 ■ Synopsis of Spine Implants: C0–C7
- 590 ■ Thoracic, Lumbar, and Lumbosacral Spine Implants
- 608 ■ Sacroiliac Joints and Pelvis
- 608 ■ Synopsis of Spine Implants: T1–S1
- 608 ■ Tongs and Traction
- 610 ■ Generalizations on Implant Prototypes

- 619 ■ **PART 5: AN ANALYSIS OF THE MECHANICS OF SPINE OSTEOTOMIES**
- 619 ■ Basic Osteotomy
- 619 ■ Cervical and Cervicothoracic Osteotomy
- 620 ■ Lumbar Spine Osteotomies

- 622 ■ Clinical Biomechanics
- 625 ■ Notes
