Roller Compacted Concrete

For heavy traffic and large rolling equipment

More durable than asphalt, high compressive strengths

Take a look at our case studies and how *imix*[®] Roller Pave was used at a distillery warehouse in Lynchburg, TN
www.irvmat.com/CaseStudies.asp

Placed with a paver, not forms, and roller compacted.

- Minimal down time
- Maximum strength

imix[®] Roller Pave's high density and low absorption allows very little moisture to penetrate the surface, greatly reducing the possibility of potholes due to freeze/thaw cycles.

2617 Grandview Avenue
Nashville, TN 37211

For more information on *imix*[®] Roller Pave, or to talk to one of our Tennessee representatives, contact us **615-884-4935**

Tonya Alexander
2017 TCA President

I want to say a hearty "Thank You!" to each of our members. Our combined support is what makes it possible for TCA to accomplish all that they do on our behalf.

TCA WORKING FOR YOU

This issue of the magazine is our annual Membership Directory issue. As TCA's current President I want to say a hearty "Thank You!" to each of our members. Our combined support is what makes it possible for TCA to accomplish all that they do on our behalf.

Just this week, I made time to attend one of the four regional TDOT Liaison meetings held each year across Tennessee. My company had other people present at this meeting but I came away with a much greater appreciation of the work that TCA does on behalf of the entire concrete industry to insure that ready mix producers are treated fairly in TDOT's bidding and acceptance processes. These meetings often get way down in the weeds—like our discussion of TDOT's specification requirement for contractor's to provide "appropriate curing environments" for all acceptance cylinders on each and every TDOT project—but those weeds are really, really important to protect ready mix producer's rights when it comes to testing and acceptance.

We also covered another big win for ready mix producers that came about as a direct result of TCA's work with TDOT—the ability for ready mix producers to switch between approved fly ash sources when there are supply outages. TCA's fly ash supplier members stepped up to help with a testing program designed specifically to address TDOT's concerns with allowing switching among sources without ready mix producers having to

go through the entire process of re-submitting new trial batches when a fly ash source goes down. TCA served as the co-designer of the study and facilitated the process of collecting materials, running numerous trial batches, and reporting the results back to TDOT. Then, several individual TCA members from numerous member companies stepped up to actually perform the required testing by spending a day mixing, testing and casting cylinders. Thanks to their extra effort, all ready mix producers now have this important flexibility to meet construction schedules without undue delay or additional costs.

I would like to urge all of my fellow members to make a personal, individual effort to get more involved with TCA—attend an event in your area, sponsor one of our Legislative Breakfasts this fall, serve on a committee or a project team that interests you. You will get more out of your investment in TCA and our combined efforts will be stronger with your participation. You should absolutely be attending our Annual Convention on February 7-8, 2018, and before that we need your participation in our annual Foundation Golf Outing next month, September 12, at the Forrest Crossing Golf Course in Franklin. You can sign up for the Golf Outing on TCA's excellent website (www.tnconcrete.org) and you can check out all the upcoming events and certification classes offered by your association.

ARE YOU STUCK?

Some of us are offended by the thought that we have to keep learning. We make the decision to drive a stake in the ground and refuse to move forward. We make a conscious decision to be "stuck."

Continual learning ... requires a parallel process of unlearning. This is where many of us get stuck, we don't want to unlearn.

I encourage you to give yourself an obsoledge audit. Get rid of the knowledge sludge that is keeping you "stuck."

Most everyone agrees that we are living in a time of rapid and often dramatic change. There is much disagreement about whether that change is good or bad, but little argument about the changing times in which we live.

One of the hallmarks of our present day is the critical need to be an ardent, persistent learner. Because things are changing so rapidly all of us are forced to continually learn new things just to stay level with the present. Of course, some of us are offended by the thought that we have to keep learning, so we make the decision to drive a stake in the ground and refuse to move forward. We make a conscious decision to be "stuck."

Our church has a ministry school that attracts students from around the world. One of the leaders of this school mentioned in a recent Sunday morning message that one of the principles of the school is continual learning and he went on to say that this requires a parallel process of unlearning.

And this is where many of us get stuck—we don't want to unlearn. One of my favorite authors was Alvin Toffler. Toffler, who passed away last year, was a well-known futurist and wrote a number of books on this subject. Toffler actually coined a term for all that stuff we have learned that is no longer applicable or important—Obsoledge, or obsolete knowledge. I think of Obsoledge as being a lot like sludge that forms in an engine when it is not properly maintained. If the sludge is not removed the engine will seize up and essentially be useless. That is great if you want to be stuck, but not so good if you want to remain productive.

I recently had a conversation with a fellow concrete industry peer who was in the process of hiring someone for a mostly business development position. A search committee had been formed and one of the people on the committee made some incredibility "stuck" comments during the reviews of persons who had made the final rounds of interviews. In their view of the world, the organization should hire someone who was first and foremost male, and secondly someone with lots of applicable experience—which is code

for being at least 40 years old.

The first 'requirement'—being a male—is actually pretty common in the construction industry but it totally ignores that our general population is over 50 percent female, and lots of research demonstrates that women actually make a majority of all purchasing decisions. It makes perfect sense if your view of the world is stuck 20 years (or further) in the past but flies in the face of reason if you are actually looking toward the future. If you are hiring someone to influence present and future decision makers it makes even less sense since an increasing percentage of them are going to be female, even in the construction industry.

From my perspective, as someone with considerable experience, that's code for being over 55—perhaps I should like the perspective that experience is important. In fact, I think experience is often undervalued today in our rush to fill positions, and there truly is very little that can substitute for experience. The reality is that "experienced" people may be senior decision makers today, but they will likely only be in those positions for a relatively short period of time.

Given that, I would argue it makes a lot of sense to hire younger professionals for a business development position because there is going to be a lot of turnover at the top of many organizations in the next five years. The new crop of decision makers will be younger, more likely to be female, and much more diverse than they are today. Having a business development position filled by someone who is similar in age and outlook to their likely target market seems to be a reasonable course of action to me.

Obsoledge can be difficult for us to identify in our own outlook but today's relentless and increasing pace of change makes it really important for us to be able to identify—and more importantly—discard knowledge that is outdated and essentially useless.

I encourage you to give yourself an obsoledge audit and then start getting rid of the knowledge sludge that is keeping you "stuck."

Commitment
is in everything we do

At Lafarge, our commitment goes far beyond the raw materials we produce. We bring together the best solutions and materials to build more durable, compact and connected cities. And when you build better cities you get buildings, roads and infrastructure that truly reflect the changing needs of today's communities.

It's this kind of ongoing dedication that's an integral part of the Lafarge culture. And it shows. Whether it's our focus on safety, the well-being of our employees, or the satisfaction of our customers – it's all about ensuring a better quality of life for everyone involved.

TCA Services & STAFF

The Tennessee Concrete Association (TCA) was founded in 1986 to promote the increased use of ready mixed concrete in Tennessee. Our mission statement is: "The TCA is the unified voice for the concrete industry to improve our image and awareness through advocacy, promotion and education that support our members, our community, and our future." We work to fulfill this mission in all of our activities. We invite you to join us in building a concrete industry we can all be proud of.

Supported primarily by membership dues, the association is governed by a 15 member board of directors elected annually by members. The board includes 10 ready-mixed producer members who direct local promotional programs in each of our three regions.

Placing Pervious Concrete

Pervious Concrete Allows Rainwater to seep into the ground. It is instrumental in recharging groundwater and reducing storm water runoff.

**Pervious is a Special Mix...
It Requires Special Tools to Place It**

WILDCAT ROLLER SCREED

Wildcat Roller Screed \$2,195
Roller Tubes \$30 per ft.
End Plugs \$290 Weight #200

COMPLETE PERVIOUS PACKAGE

"The Wildcat Screed has become my preferred placement method because of it's lightweight, easy to use, and produces a great finish."

Sarah Egan
TN Concrete Association
NRMCA Certified Pervious Concrete
Installer

The Wildcat Roller Screed is the easiest to use on the market and the most economical. It is also an ideal tool for concrete sidewalks, walking trails and golf cart paths.

We welcome comparison to any other brands.

ADVANCING THE CONCRETE INDUSTRY

CIM 2017: A Busy Calendar in Review

THURSDAY, 3/2 – INTERNSHIP SPEED INTERVIEWING DAY

Early in March, the CIM Program at MTSU had the largest turnout ever for our fourth annual *Internship Speed Interviewing Day*. This unique event focuses on connecting students with employers for summer opportunities in concrete and construction. CIM majors interviewed for six minutes each with 20 employers from a variety of areas of the industry including ready mix, materials, precast, testing labs, contracting and equipment manufacturers. An even bigger accomplishment was the 36 percent increase in student participation with a total of 45 students interviewing and attending workshops prior to prepare.

WIRTGEN GROUP MEETS PHILLIPS

MTSU senior Chase Phillips, left, of Roswell, Ga., shakes hands with the Wirtgen Group's Hunter Harber, right, as Josh Wilson, center, and Jeff Johnson watch. Phillips was wrapping up his six-minute speed interview with the company March 2 in the James Union Building's Tennessee Room. Chase is a CIM and Recording Industry Management double major and will work this summer in Atlanta with Argos as he finishes up his coursework to graduate in December 2017.

BLUE DOT INTERVIEWS DOTY

MTSU junior Todazja Doty of Memphis, Tenn., responds to questions about her MTSU Concrete Industry Management experience from CIM alumnus Austin Walker, and other employees of Blue Dot Read-Mix in Charlotte, N.C.

BRECKENRIDGE INTERVIEWS THIGPEN

Logan Thigpen, right, an MTSU junior from Murfreesboro, receives advice from MTSU senior Everett Dunlap of Knoxville, Tenn., as Breckenridge Material Co. recruiters Ryan Bohan and Barb Palmer listen. Breckenridge has hired Dunlap to work full time upon his May 8 graduation and Logan will join him as an intern for the summer.

WEDNESDAY, 4/19 – WOMEN'S LUNCHEON

On Wednesday, April 19, CIM hosted the 10th Annual Women in Concrete Luncheon with Senior Director of Marketing for Lehigh Hanson, Lori Tiefertalher as the keynote speaker. Tiefertalher shared her experiences as a women over her 30 year career in concrete and construction with the 40 attendees. Many female CIM alumni, MTSU supporters, and industry professionals were in attendance at this year's event.

10TH ANNUAL WOMEN'S LUNCHEON

Current students in attendance at the Women's Luncheon with School Director, Dr. Heather Brown, left, and speaker Lori Tiefertalher, right.

WEDNESDAY, 5/3 – CIM PATRON'S GOLF TOURNAMENT

To cap off the spring semester the CIM Patron's hosted the 13th Annual CIM Patron's Golf Tournament to benefit the School of Concrete and Construction Management's building fund. A record breaking year for the golf tournament with a morning and afternoon round to accommodate 52 teams. In addition, over 50 alumni attended the event and \$98,200 was raised through teams, sponsorships and a raffle. Thanks to all that came out to support the program and our efforts!

13TH ANNUAL CIM PATRON'S GOLF TOURNAMENT

Golfers in the afternoon round line up to hear from Dr. Brown prior to their shotgun start.

CIM Patron and alumni, Kell Harvey sells raffle tickets and markets membership to join the Patrons Group at registration. Alumni Cody Eaton and Kyle Weatherly pull out their wallets in support of the program. *
