## Chlorine Emergencies: An Overview for First Responders

The latest edition of Chlorine Emergencies: An Overview for First Responders (FR-DVD) is now available to [stream online or download from the bookstore](#). The video was developed to help first responders to prepare to act in those critical first 15 minutes – what to do when the call comes in, what you might expect on-scene, and where to find the resources you'll need to contain a release. This second edition has been expanded to include information on resources for mobile devices, security & antiterrorism considerations, a more robust explanation of shelter-in-place, and more chlorine release footage.

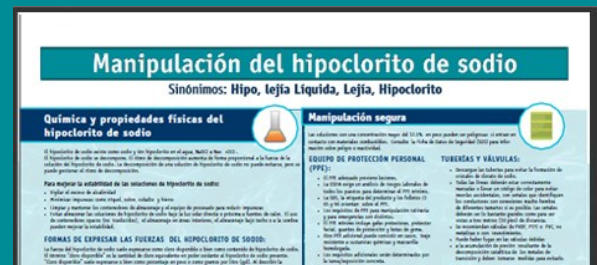

## Upcoming Training Events

CI members will be hosting and presenting at a number of training events. Click on the titles below to find out more information about individual events. If you are planning on attending, stop by and bring your questions!

3/12	<a href="#">Louisiana Water Conference</a>	Alexandria, LA
