

RACE CAR COMPETITION

Car Requirements

1. Each competitor must build his or her own race car.
2. All cars must conform to the following specifications:
 - Length – maximum 18". Cars cannot extend beyond, over, or above the start gate pin (pin is 1½" high). A ½" wide bumper in the center of the car both on the front and the back is required to make contact with the pin. See illustration.
 - Width – maximum 6".
 - Height – maximum 6".
 - Weight – maximum 1 lb. 8 oz.
 - Race cars can only be gravity powered.
 - Race cars must use at least three maintenance supply parts (wood does not count).
 - Glass may not be used on race cars.
 - Approved yellow competition wheels provided by the Tulsa Apartment Association for the current competition and may not be altered or modified (2 large and 2 small).
3. Participants who do not enter a car cannot win the overall awards.

Competition Instructions

1. Test the car on the track to make final adjustments before check-in with a race judge.
2. Check your car in with a race judge.
3. Race cars that pass the check-in process are placed in quarantine and can no longer be tested or modified.
4. Race cars that fail the check-in process receive a total time of 20 seconds for the race car competition. Your car will not be allowed to race.
5. Cars are raced twice, once down each lane.
6. In the event the car does not cross the finish line under its own power, a time of 10 seconds will be marked for each incomplete run.
7. If, during a race on either lane, a part on a car, including a wheel, falls off, a time of 10 seconds will be marked for the incomplete run.
8. Total competition time is the sum of the two runs.
