On The Cover

Left: The World and U.S. Championship Cheese Contests are the pinnacle of dairy processing excellence, offering a platform for cheese, yogurt, butter, and dry dairy ingredient manufacturers to showcase their craft and achieve industry-wide recognition.

Top Right: WCMA is proud to be a strong, effective voice for dairy manufacturers, processors, marketers, and their supplier partners at the state and federal levels. Our experienced staff help members connect directly with policymakers and regulators seeking to better understand and serve their industry.

Middle Bottom: Cheesemakers and industry suppliers come together at WCMA's annual Championship Cheese Auction at CheeseExpo and CheeseCon, raising more than \$300,000 each year for industry scholarships and education.

Bottom Right: Hosted by WCMA and the Center for Dairy Research CheeseCon and CheeseExpo offer limitless opportunities for learning, growth, and connection.

WCMA member Schuman Cheese-Lake Country Dairy welcomes U.S. Trade Ambassador Doug McKalip (center) to Turtle Lake, Wisconsin for a tour and tasting of its award-winning line of hard Italian cheeses. WCMA facilitates productive conversations with U.S. Trade Representative staff on the topics that matter most to members, like the protection of common food names.

**A MESSAGE TO
OUR MEMBERS**

It's here! Your 2025 edition of WCMA's Member Directory features key information about your trade association, plus direct access to your peers in dairy processing and the companies providing cutting-edge equipment, services, and insights to propel your business forward.

Wisconsin Cheese Makers Association is your connector, advocate, and partner. Our expanding committees and working groups are continually developing new resources by and for our members. From policy advocacy and regulatory updates to labeling, marketing, and sustainability, we safeguard the industry's success while offering the information, technical support, grants, and training that foster innovation and career development.

Explore all the tools and benefits your WCMA membership provides. Our members are behind every new WCMA initiative, from Contests and Expos to trainings and programs. Your ideas are our inspiration!

TOWER ABOVE THE REST.

Introducing the Advanced Cheese Tower. The newest addition to APT's line of signature cheesemaking equipment.

Tower heights customizable to suit your needs

- The sleek design of the tower base minimizes the footprint needed.
- The elevator utilizes a belt-driven servo drive for the most accurate and consistent block size.
- Operator-friendly controls allow for simple and easy tower control in all operational phases.

From conceptual designs to executed solutions, our expert team delivers high-performing systems.

WCMA Young Professionals

WCMA Health & Safety Group

WCMA Technology Committee

WCMA COMMITTEES & GROUPS

WCMA offers many avenues for members to expand their knowledge and their networks. Learn more at [WisCheeseMakers.org](https://www.wischeesemakers.org), and get involved in one of our open opportunities today!

THE B-TEAM

All interested members are welcome to join this group of dedicated volunteers who help receive and process entries and support our judges at the World and United States Championship Cheese Contests.

DAIRY FOOD SAFETY ALLIANCE

In collaboration with the Center for Dairy Research, the Dairy Food Safety Alliance offers the latest in food safety education and regulatory updates to all interested dairy farmers, manufacturers, processors, and suppliers.

WCMA DAIRY EXPORT GROUP

WCMA's open Dairy Export Group delivers insights on international trade opportunities, strategies, and resources for dairy processors launching or expanding their export endeavors.

WCMA HEALTH & SAFETY GROUP

WCMA's Health & Safety Group, open to all interested members, helps dairy processors assess and improve their health and safety policies, prepare for future inspections, and connect with their peers.

WCMA POLICY COMMITTEE

The WCMA Policy Committee, open to all interested members, helps develop and execute WCMA's advocacy priorities, policy initiatives, and legislative agenda.

WCMA DAIRY SUSTAINABILITY GROUP

WCMA's open Dairy Sustainability Group focuses on the practical needs of dairy processors as they endeavor to increase environmental sustainability practices while producing delicious, nutritious dairy foods to feed the world.

WCMA TECHNOLOGY COMMITTEE

WCMA's Technology Committee is open to all members interested in exploring technical issues – particularly wastewater management and regulation – in the dairy processing industry.

WCMA WORKFORCE & EDUCATION COMMITTEE

Open to all interested members, WCMA's Workforce and Education Committee develops and supports efforts to attract, train, and retain a high-quality workforce.

WCMA YOUNG PROFESSIONALS

The WCMA Young Professionals group welcomes all member employees under 40 for networking events designed to foster friendships and help the industry's next generation learn more about their craft.

WCMA CONTEST COMMITTEE

The appointed members of WCMA's Contest Committee devote hundreds of hours each year to plan and execute the World and United States Championship Cheese Contests.

WCMA MEMBERSHIP COMMITTEE

The WCMA Membership Committee, limited to appointed members, reviews the Association's membership structure and develops strategies to recruit and retain members.

WCMA RECOGNITION COMMITTEE

WCMA's Recognition Committee, limited to appointed members, considers and recommends long-time industry leaders for honors from WCMA.

WCMA SUPPLIER COMMITTEE

The appointed members of the WCMA Supplier Committee review and improve Association events, including CheeseExpo, CheeseCon, and our Golf Outing & Trap Shoot.

[WisCheeseMakers.org](https://www.wischeesemakers.org)

WCMA RESOURCES & SERVICES

With a diverse offering of resources and services, WCMA is your daily, reliable partner in business growth. Visit **WisCheeseMakers.org** to explore all your Association has to offer - and share your ideas anytime to help us serve you better.

INDUSTRY-SPECIFIC TRAINING

LEADERSHIP

- Our Front-Line Leadership Training series, held in-person and online throughout the year, helps both new and experienced supervisors enhance their interpersonal skills and lead their teams successfully. This series consists of three one-day sessions, available individually to suit your needs.

- Next Step Leadership, offered annually, provides a deep dive on a different human resources topic each year.

EMPLOYEE SAFETY

- Launched in 2024, WCMA's Train the Safety Trainer Course is designed specifically for safety instructors in the dairy processing industry. This course equips your valued safety trainers with the knowledge and tools to clearly communicate safety expectations and ensure compliance with safety protocols. WCMA's new Basic Safety Training for Dairy Processors educates participants on their rights, the responsibilities of employers, and how to recognize, address, and avoid workplace hazards they might encounter.

SUSTAINABILITY

- Lead your business into the future with personalized support for sustainability efforts, including environmental initiatives, business planning, and more.

WCMA's top-rated industry training programs have helped thousands of dairy processing employees strengthen their leadership and safety skills.

VALUABLE BUSINESS RESOURCES

GRANTS

Access millions of dollars in state and federal grant opportunities to spur innovation, support your valued workforce, and modernize your operation.

- The Dairy Business Innovation Alliance, administered by WCMA and the Center for Dairy Research, offers \$100,000 grants twice a year to Midwestern dairy farmers, processors, and manufacturers. WCMA also connects members with DBIA's counterparts in Vermont, Tennessee, and California.

\$5 Million
Each Year To Dairy Processors

- The Wisconsin Agricultural Roads Improvement Program (ARIP), a \$150 million state budget initiative championed by WCMA and a coalition of Wisconsin agricultural partner organizations, supports necessary improvements to the rural roads dairy processors, their farmer partners, and their employees use every day.
- Launched in December 2021 following successful advocacy efforts by WCMA and other Wisconsin agricultural groups, the Wisconsin Initiative for Agricultural Exports provides funding to support the state's dairy, crop, and meat sales overseas. WIAE boosts the state's International Agribusiness Center and funds industry-run grant programs, including an Export Expansion grant run by WCMA.

EXPORT

- Expand your sales overseas with WCMA's export services, which include free consultations with an experienced expert, an online library of resources, and informative workshops.

WORKFORCE SUPPORT

- Introduce your new hires to dairy processing with WCMA's free Video Onboarding Series, available in English, Spanish, and Hmong.
- Our annual Wage & Workforce Survey, available for free to members, delivers key data that dairy processors need to attract and retain top talent.
- Post up to 10 job openings per month for free on our online Jobs Board.
- Encourage your employees and their children to apply for one of WCMA's seven scholarships, worth a total of \$19,000 each, offered annually to aspiring dairy professionals.

ENGAGING GROWTH OPPORTUNITIES

Join experts, colleagues, and peers for learning and business development at one of WCMA's unique workshops and meetings, open to all in industry.

- Our Materiality Workshop, hosted in partnership with Innovation Center for U.S. Dairy and Harbor Environmental, guides participants through actionable steps to complete a materiality assessment for their business.
- Each year, the WCMA Dairy Export Group meets for a day of networking, updates on the current state of U.S. dairy exports and trade agreements, and informative presentations.

Offered in partnership with leading dairy sustainability experts, WCMA's Materiality Workshop guides dairy processors through practical exercises, exploring ways to grow their sustainability efforts.

EFFECTIVE, STRATEGIC ADVOCACY

WCMA is your informed and connected voice in Wisconsin and Washington, D.C. Our experienced staff is active in advisory groups, agencies, and maintains constant communication with legislators and regulators on key issues, including:

- Food safety
- Workforce development
- Transportation
- Milk pricing
- Trade opportunities
- Nutrition programs
- Immigration
- Business-friendly policy

Member involvement has driven WCMA's successful lobbying efforts, resulting in new and improved grant programs, export initiatives, clearer regulations, and enhanced food safety tools.

TIMELY COMMUNICATION

In today's fast-paced, competitive dairy processing industry, staying informed is critical. WCMA's weekly e-newsletter – a member exclusive – keeps you up-to-date on all the latest.

Each month, our free webinars tackle current hot topics, offering practical advice from industry experts. Additionally, WCMA celebrates your achievements daily on our popular social media channels.

Over 30
Webinars Available Online

WELL-DESERVED RECOGNITION

- WCMA's annual Recognition Awards honor individuals who have made significant contributions to the future success of the dairy processing industry. These awards celebrate cheesemakers, suppliers, marketers, business leaders, researchers, and dedicated WCMA leaders.

In WCMA's Basic Safety Training for Dairy Processors, participants get a hands-on learning experience focused on key safety measures, tailored to the dairy processing industry.

Dave Leonhardi of Nasonville Dairy accepts the WCMA Luminary Award, one of six annual honors presented to exceptional dairy processing professionals.

WCMA SIGNATURE EVENTS

U.S. CHAMPIONSHIP CHEESE CONTEST

March 4-6, 2025 | Green Bay, WI

Witness America's best dairy processors vying for the honor of being declared the U.S. Champion Cheese at the nation's premier dairy products competition – hosted by WCMA biennially since 1981.

USChampionCheese.org

WORLD CHAMPIONSHIP CHEESE CONTEST

March 3-5, 2026 | Madison, WI

WCMA presents the world's largest technical dairy products evaluation, featuring an elite team of expert judges assessing thousands of entries across 142 distinct classes. Don't miss this exciting biennial competition for the industry's most prestigious title: World Champion Cheese.

WorldChampionCheese.org

WCMA GOLF OUTING & TRAP SHOOT

July 16, 2025 | Central Wisconsin

Dairy processors and their supplier partners convene for this popular annual outing filled with fun and connection. New and experienced golfers and trapshooters alike enjoy a day of industry-wide networking and camaraderie in beautiful central Wisconsin. Mark your calendar – this highlight of the summer sells out quickly.

WisCheeseMakers.org

CHEESECON

April 15-17, 2025 | Madison, WI

Join WCMA, the Center for Dairy Research, and thousands of your colleagues in dairy processing for informative education, valuable networking, exciting celebrations of the industry's best, and a 75,000-square-foot trade show floor, featuring tabletop exhibits from top suppliers of dairy processing equipment and services.

CheeseCon.org

CHEESEEXPO

April 14-16, 2026 | Milwaukee, WI

Gather with more than 4,000 peers in the global dairy processing community to build connections, recognize industry excellence, and experience the latest in cheese technology, products, safety, marketing, and more, brought to you by WCMA and the Center for Dairy Research. This one-of-a-kind event features expansive displays of cutting-edge equipment from over 300 trusted industry suppliers.

The Proof is in the AWARD-WINNING TASTE

How will BIOIONIX® impact the taste of my product?

The judges of our global cheese partners have answered that! We're proud to team up with many award-winning cheese brands.

The BIOIONIX solution eliminates bacteria, yeast/mold, and other pathogens without harmful chemicals.

- ⚡ Improved taste and food quality
- ⚡ Safer for employees
- ⚡ Save water, time, money

BIOIONIX
a more perfect solution

HELPING THE DAIRY INDUSTRY

- Customized water treatment programs
- Control corrosion, deposits, and microbiological growth.
- Maximize system life and efficiency.

**Customized Water Treatment Solutions**

Dairy plants and their water treatment needs are as varied as the products they create. Chem-Aqua offers expert service and a comprehensive set of solutions to meet the challenges of the dairy industry. Our approach is the difference. We create customized water treatment programs tailored to the needs of the individual dairy plant.

Proven Experience

Chem-Aqua has the proven water treatment experience to help dairies protect their valuable systems. We offer a full line of products to meet USDA, FDA, NSF, and CFIA regulations. From boilers and cooling towers to sweet water loops and wastewater plants, we have the experience, products, and equipment for all of your water treatment needs.

NO Comparison

No other anti-caking technology
can match Free Flow® XF.

Free Flow® XF is the cheese anti-caking technology that eliminates gas flushing. Now there's no need for nitrogen gas, equipment and maintenance. And there's no CO₂ required. That means XF simplifies production, significantly reduces costs, cuts down on dusting and increases uptime in your plant.

To learn more about new Free Flow® XF contact

KEY CONTACTS

Joe Widmer, Cheesemaker, President
joew@widmerscheese.com

Joey Widmer, Vice President of Operations and Plant Manager
jcw@widmerscheese.com

Dustin Wallendal, Head Cheesemaker and Assistant Plant Manager
dustinw@widmerscheese.com

Jill Carini, Food Safety Coordinator
jillc@widmerscheese.com

Hannah Widmer, Office Manager/HR Assistant
widmers@widmerscheese.com

Production at this location:

Brick, Cheddar, Colby, ButterKase, Curds, Flavored Natural

WINONA FOODS, INC.

1552 Lineville Rd, Green Bay, WI 54313
(920) 662-2184
winonafoods.com

KEY CONTACTS

Luke Kelly, CFO
lkelly@winonafoods.com

Terry Steinmann, President
tsteinmann@winonafoods.com

Dave Meyer, Vice President
dmeyer@winonafoods.com

Production at this location:

Natural Cheese, Process Cheese Products, Cheese Sauces, Cream Cheese, Icing, Carmel, Red Sauces, Bulk Process: 20/40lb Blocks, Portion Control Cups, Bottles, Pouches, Bags, and Flexible Packaging.

Additional Location

1521 Brookfield Ave, Howard, WI 54313

Production at this location:

Sliced Cheese, Shredded Cheese, Cubes, Dicing, Cheese Chunking, Natural Cheese, Specialty Cheese, Imitation Cheese, Vegan Cheese, Italian Cheese, Performance Cheese, Conversion and Distribution Center, Cooler Distribution Center

Z

ZIMMERMAN CHEESE

N6853 Hwy 78, South Wayne, WI 53587
(608) 968-3414
zimmermancheese.com

KEY CONTACTS

Mark Witke, President
mark@zimmermancheese.com

Paul Witke, Vice President
paul@zimmermancheese.com

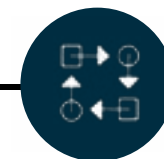

Production at this location:

Muenster, Brick, Farmers Cheese, Low Sodium, Reduced Sodium, Curds

In-Plant Solutions

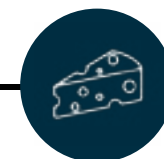

Empowering smarter decision making and enhancing every aspect of dairy production.

Enhance your efficiency, productivity, and ROI with innovative in-plant solutions

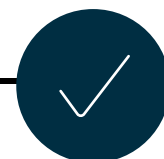

S&OP Increase Efficiency

Enhances plant profitability by providing optimization insights to your supply chain (demand, operations and supply)

Yield Optimization Cheese / Powder Yield

Digitize the make sheet and feed to AI / Machine Learning to maximize yield

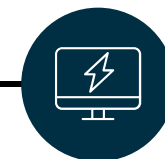

Better Quality & Margins Reduced Undergrade

Evaluation of quality issues to find root cause & improve margins

Reduce Solids Loss Mass Balance

Solids loss tracking throughout the plant by zone with expert help

Utility Optimization Sustainability

Track energy, water and any other utility to audit your plant

Margin Certainty Market Hedging

Leverage machine learning forecasts with real production data to stay ahead of market risks

Work smarter, not harder, with solutions that take dairy processing to the next level.

airqualityprocess.com

KEY CONTACT

Severine Dolci, Sales Manager
severine.dolci@airqualityprocess.com

ORGANIZATION OVERVIEW

For over 30 years, Air Quality Process (AQP) has been designing, manufacturing and commissioning tailor-made hygienic solutions in the air-treatment for cheese dairies, worldwide.

AQP meets your highest hygiene standards with the world's only USDA-approved conditioners. 100% made in France, we are very active in North America, where more than 30 cheese dairies & industrials are using our equipment. Our first equipment installed in 1988 in the state of Illinois is still working and has lost none of its performances.

We provide custom solutions for your entire cheese dairy, including air-flow management control (overpressure of the most sensitive rooms), and individualized air treatment (control of temperature and humidity) in production, acidification, brine, drying, aging, cooling, slicing/packaging rooms and R&D cells.

Christian Grandvoinnet is our local contact in North America, please call him at +1 (514) 299-2844 or email him now christian.grandvoinnet@gmail.com.

We offer process and technical expertise for gas applications, including milk and whey pH adjustment, freezing, Modified Atmosphere Packaging, nitrous oxide for whipping cream, wastewater treatment, welding and more.

AIRLITE PLASTICS

16709 Farrago Trl, Farmington, MN 55024

(888) 228-3506

airliteplastics.com

KEY CONTACT

Dave Osley, Regional Sales Manager
dosley@airliteplastics.com

ORGANIZATION OVERVIEW

We're a future first organization delivering the highest quality since 1946. We're proud of our storied past, but our sights are set on the future. Every day, our goal is to better our process, planet, and customers' business.

Airlite Plastics is a privately-held, family-owned packaging company based in Omaha, Nebraska. In operation since 1946, we've grown to over 1,100 highly-skilled staff across our six North American locations. In this era of dizzying change and SKU proliferation, we're the premier partner for North American companies looking to stand out on the shelf.

We've built a reputation over time as an innovator. We were ahead of the curve when we released one of the first in-mold labeled containers in 2006 and continue to lead today with our industry-leading portfolio of nearly 50 IML containers.

Our customers in the consumer food and beverage industries benefit from our technology and know-how, which allow us to quickly create imaginative, custom solutions, aligned with industry trends.

For decades, Airlite has been well-known as an innovation leader of our industry. We don't just talk about innovation; we weave it through everything we do. No one else will step out on a limb like Airlite Plastics to embrace a new and better way. We aren't afraid to fail, and that's been the key to our success.

AIT WORLDWIDE LOGISTICS INC

AMALGAMATED RESEARCH LLC

2531 Orchard Dr E, Twin Falls, ID 83301

(208) 735-5400

arifractal.net

KEY CONTACT

Cade Haskell, Project Leader

chaskell@arifractal.com

ORGANIZATION OVERVIEW

Amalgamated Research LLC (ARI) conducts process research and development, specializing in separation, mixing, and fluid distribution/ collection technologies. ARI's services range from lab and pilot-scale testing to full-scale industrial installation.

ARI develops and installs industrial separation and purification systems, including simulated moving bed (SMB) chromatography and ion exchange processes. ARI's separation technologies are installed worldwide and serve a diverse range of industries, including food and sweeteners, renewables and biofuels, water treatment, mining, and petroleum.

ARI is the inventor of engineered fractals for fluid transport, which improve efficiency in distribution and mixing processes. Compared to conventional mixers and fluid distributors, ARI's patented fractal technology demonstrates significant reductions in energy use and improves accuracy during process scale-up.

ARI provides customers with a full spectrum of support, from lab and pilot-scale research to industrial implementation and ongoing technical assistance. ARI's lab and pilot facilities are continually expanding to support product innovation, and these facilities are available for customer R&D and process demonstration.

ARI is a wholly owned subsidiary of the Amalgamated Sugar Company LLC, allowing ARI to operate as an independent company while being backed by one of the largest and most experienced sugar processors in the United States. The established history and secure structure of ARI provides customers with confidence that projects will be carried out to completion with innovation and reliability.

ORGANIZATION OVERVIEW

Begert Stainless, Inc. (BSI) is a Preferred Stainless Tank and Vessel Manufacturer serving the Food, Dairy, Craft Brewing, Beverage, Industrial, Chemical, Automotive and Pharmaceutical Industries.

As Christian business representatives, we continually strive to steward BSI with the utmost integrity, focusing on Eternal Standards to the benefit of; GOD ABOVE ALL, our amazing Team members and their families, our customers, our vendors, our neighbors, their neighbors, you, your neighbors - ALL in service to bring honor and glory to the name of Yeshua and to see His Message sweep across all the nations in the most explosive and radically effective way ever known to exist on this temporary planet we currently call home.

As a Spirit-led and Christ-centered business, we are in the business of building relationships first and foremost, and with that we take the word 'TRUST' to the core of our Leadership Team. We have determined that trust must always exist within every decision that we make. BSI defines 'TRUST' as:

Truthful

Relational

Unashamed

Servitude

Transparency

We are and work best with those who are:

Humble ~ Hungry ~ Smart

We Abide by our Core Values:

Integrity • Honesty • Perseverance • Loyalty
• Respect

BSI Specialties:

Stainless & High Alloy ASME Vessels, Stainless Atmospheric Tanks, 3-A Tanks, Utility Piping, Jacketed Piping, Prefab Piping, Pipe Spools, Valve Clusters, Tanks, Hold Tubes, Conduit, Flow Panels, Ductwork, Catwalks, Railings, Stairways, Platforms/Decking, Trolley Systems, CIP/HTST Systems, Skid Systems...

BSI Employs: First-class Fabricators & Welders who pride themselves in excellence of craft and integrity of conduct. With more than 20 Fabricators & Welders we share over 250 years of combined industry experience. We certify that all weld procedures, welders and weld operators are qualified and tested in accordance with ASME Section IX, which meets or exceeds the requirements of AWS B2.1, AWS D1.1 and AWS D1.6

ORGANIZATION OVERVIEW

Founded in 2001, CA Overland Solutions provides certainty in the ever-changing transportation industry, specializing in asset-based and 3PL services. We provide customers with reliability and a trusted transportation partner to help navigate transportation needs. We believe in building long lasting partnerships with our customers built on a solid foundation of trust. Headquartered in Wabasha, MN, with offices in Oakdale, MN, and Visalia, CA, we operate over 150 trucks and 300 trailers, supported by a network of over 10,000 carriers. Our primary customers are within the dairy industry, where we excel in delivering reliable transportation. Our future goal is to continue expanding our customer base while maintaining our commitment to reliability and excellence.

CALORIS ENGINEERING

(410) 822-6900
caloris.com

KEY CONTACT

Jim Peterson, President
jpeterson@caloris.com

ORGANIZATION OVERVIEW

Caloris transforms process systems design for the better with unexpected, future-focused solutions that solve real operational problems. We engineer efficient, dependable and productive solutions that also improve environmental sustainability where practical. Designed with the end user in mind to drive plant productivity. Caloris offers evaporation, membrane filtration and spray drying process systems for food and dairy industries, as well as for water reuse and wastewater treatment applications. Both Caloris' custom and pre-engineered packaged systems are designed to meet our customers' specific concentration/purification needs utilizing the most cost effective and energy efficient technologies available. Whether concentrating dairy, food or juice products at a high-volume production facility, or processing industrial wastewaters to reduce transportation and treatment costs and recover re-usable water, Caloris provides a range of options and technologies.

CAMA NORTH AMERICA

901 Corporate Grove Dr, Buffalo Grove, IL 60089
(847) 607-8797
camagroup.com

KEY CONTACT

Kim Haller, Business Development Manager
kim.haller@camagroup.com

ORGANIZATION OVERVIEW

Cama North America, Buffalo Grove, Illinois, is a leading supplier of secondary packaging, robotic systems, and integrated packaging solutions for a wide variety of markets, including dairy applications such as cheese, yogurt, ice cream, and snacks. Our product line includes case packing systems for RSC, wrap-around and display cases; forming, closing and lidding machines for boxes, trays and RSC cases; intermittent and continuous motion cartoners; carton sleeving machines; and integrated decoupled and monoblock robotic loading units.

We have more than 30 years' experience supplying food packagers and other customers with innovative solutions that help improve efficiency and optimize production. Cama North America provides local engineering, manufacturing and aftermarket services, including technical service, programming and parts. We take pride in our long-term customer partnerships and consultative approach to providing customized systems using proven, modular state of the art technology.

Cama's secondary packaging machines deliver incredible levels of flexibility, not just in terms of their ability to handle a wide array of products, package styles and formats, but also in terms of size, mixed flavor bundles and variety packs. Our solutions cater to a mixture of high speed/mass production and small volume/artisanal, often within same plant, and can handle cartons, pouches, boxes, flow packs, tubs, trays and tins, as well as mixed-flavor packaging, varying product counts, promotional packs and multi-vendor/multi-brand production.

In addition to addressing regulatory compliance, including washdown, contamination, voids & trap points, Cama's advanced technology also delivers connectivity to enterprise systems for batch data capture, ERP and remote maintenance.

Cama North America is a subsidiary of the privately-owned Cama Group, Italy, which is known throughout the world for its cutting-edge technology and reliable, innovative packaging systems.

We combine the precision of craftsmanship with decades of experience to conceive, craft and deliver the very best insurance coverage and service to individuals and families, and businesses of all sizes.

CIRCLE INCORPORATED

2756 Whiting Rd, Burlington, WI 53069
(262) 539-4400
circleincorporated.com

KEY CONTACT

Marc Pelchat, Director of Sales and Marketing
mpelchat@circleincorporated.com

ORGANIZATION OVERVIEW

Since the mid-1800's, the Fox River Valley region of Wisconsin was the mainstay of the paper industry by harnessing the power of water to operate mills and provide transportation of wood from rich forests in the north.

Transporting large rolls of paper from mills to binderies and beyond created the need for protective packaging. Circular-shaped roll-headers were needed to protect the ends of the rolls from becoming damaged in transit; this became the namesake of Circle Incorporated as it was the very first product offered in our now extensive line of products.

Our family-owned company has been around since 1978, beginning as a “kitchen table office” with production taking place in a sheltered workshop in the Fox Valley. An opportunity to provide custom packaging to papermills across the US and Canada also opened the door to fulfilling needs in other industries. By 1989, the need to expand production brought office spaces and the manufacturing plant to Burlington, WI where its proximity to hubs in the Midwest, North-and Southeastern states and Canada were easily accessed.

In 2005, Circle built its current 72,000 square foot facility in the Burlington Manufacturing and Office Park. 2019 saw an additional 48,000 square foot warehouse expansion to shorten lead times for customers.

Circle continues to seek opportunity from industry evolution. The technology age has loomed as a potential threat to the paper industry, forcing many mills to close their doors and many product lines to become obsolete. Written forms of media have largely transitioned digitally, reducing the need for many paper products produced by mills and the protective packaging they utilized. These changes created our innovative focus and ability to remain relevant. With product lines varying from the original circular roll-headers to athletic grade rubber matting, Circle leads the way supplying custom manufactured products with a personal experience you can only find with a small business.

KEY CONTACT

Jason Ross, Food & Beverage Market Segment Manager

jross@curtisswright.com

ORGANIZATION OVERVIEW

Curtiss-Wright manufactures Exlar® electromechanical linear roller screw actuators, rotary servo motors, and integrated control solutions for a broad range of applications. Our roller screw technology provides an efficient electric replacement for hydraulic or pneumatic cylinders and a more robust replacement for ball screws. With forces up to 80,000 pounds and speeds up to 60 inches per second, we can deliver higher force and speed in smaller packages than other comparably sized actuation technology. The Exlar team of highly skilled engineers can put together the right solution for you to increase productivity, reduce maintenance, and reduce your total cost of ownership.

ORGANIZATION OVERVIEW

Founded in 1980, Dairyland Packaging made a name for itself servicing the dairy and agricultural industry in Wisconsin. Since then, we have experienced uninterrupted growth, and expansion. Our customer base now spans across international markets and covers multiple industries.

Located in South Central WI for over 40 years, we have always stayed true to our roots. Through hard work, expanding product lines, reliable vendors, and customer loyalty we continue to grow. Our sales team is one of the most experienced in the industry, and has extensive knowledge covering all areas of packaging.

We offer custom packaging solutions and are committed to becoming a preferred packaging provider. Through the partnerships we've built with our certified manufacturers, we are not limited to the resources of a single plant. We have a comprehensive product offering that allows us the flexibility to improve lead times, offer competitive pricing, JIT and VMI programs.

Proud Members of SWCMA, WCMA, CWCBA and WDPA.

cheesemoulds.com

KEY CONTACT

Roopendra Chavan, Director
roopendra@dairyautomation.com

ORGANIZATION OVERVIEW

Dairy Automation Pvt. Ltd. (DAPL) is a trusted manufacturer of top-quality cheese moulds and equipment for cheese production. We provide moulds for all types of cheese, including hard, semi-hard, and soft varieties. Our product range includes single moulds, multi-moulds, and custom moulds, all designed to improve the texture and increase the yield of your cheese. Our moulds ensure the perfect combination of drainage and patterning, resulting in better whey removal and a superior final product.

Competing alongside well-known companies like Laude, Servi Doryl, and Busquí, DAPL stands out with our focus on reliability and performance. Our products are built using high-grade materials and advanced manufacturing techniques, ensuring they perform well in various production settings. We are proud to hold CE, ISO 22000, and ROHS2 certifications, which guarantee our commitment to quality, safety, and environmental care.

In addition to our moulds, we offer a full range of cheese-making equipment, from milk processing to final packaging. Our equipment is designed to fit seamlessly into your existing operations, helping you work more efficiently and consistently. We know that every cheese factory is different, so we offer tailored solutions to meet your specific needs.

All of our products are FDA-certified and comply with international standards, including CODEX (EU) regulations. We also focus on sustainability—our moulds are fully recyclable and made with minimal impact on the environment.

At DAPL, we're not just a supplier; we're your partner in success. We work closely with our customers to understand their challenges and deliver solutions that help them succeed in the competitive cheese industry.

For more information, please visit www.cheesemoulds.com and www.dairyautomation.com.

(641) 357-2283
deansnyder.com

KEY CONTACT

Tania Bowman, Business Development Associate
taniab@deansnyder.com

ORGANIZATION OVERVIEW

Dean Snyder Construction (DSC) is a family-and-employee-owned and operated general contractor, construction manager and design-build firm, established in 1958. We have been designing and constructing high-quality food processing plant facilities since 1986. We know that the processing, storage, and preparation of food ingredients and packaged food products require the highest standards of quality and built to meet all relevant health and safety regulations. We believe that quality begins with the planning and construction of the buildings and facilities where those processes take place, and that the best way to accomplish that is to have experts and resources that are dedicated, full-time, to the specialized needs and demands of the food industry.

As a full-service, design-build firm, DSC provides food and beverage project management with one point of contact from start to finish. From R&D to commissioning, we can manage your entire process. Our team, including engineers, design professionals, and project managers, is experienced in all phases of food-related construction and engineering. We understand the demands of the food processing environment, and we pride ourselves on creating quality, innovative solutions to make each project safer and more efficient.

The traits of hard work, straight talk, owner involvement, and a commitment to exceeding our client's expectations has led to long-term customer satisfaction. Evaluating and choosing a partner for a construction project can be a challenging decision process. Whether a company is one of our many long-time and multi-project clients, or considering DSC for the first time, our goal is to make sure the decision is one they feel good about years after the project is complete. For more information about DSC, please visit www.deansnyder.com.

DETECTAPRO PRODUCTS

W146N5741 Enterprise Ave, Menomonee Falls, WI 53051
(414) 438-4050
detectapro.com

KEY CONTACT

Paul Gaertner, President
paul@detectapro.com

ORGANIZATION OVERVIEW

Detectapro is a supplier of metal detectable products used by companies in support of quality control efforts. Detectapro products help to reduce foreign objects contamination. All Detectapro products adhere to the BRC8 Section 4.9.6.2. requirement regarding small parts. Unlike our competitors, all our products are molded without metal springs or other small parts that could separate from the detectable body during usage. Other items such as detectable cable ties, markers, scrapers, knives or key hole tags all comply to section 4.9.6.2. and have no small parts. Reasons for implementing metal detectable products range from companies following HACCP, or GMP or in the implementation of a six sigma program. Our products are primarily designed for use in the food processing or pharmaceutical manufacturing industries, but can be used in support of any effort to reduce foreign objects contamination. All companies using metal detection or X-Ray equipment in efforts to inspect for foreign objects contamination are candidates for Detectapro products. Detectapro is dedicated to developing and introducing new metal detectable products to the industry, and works closely with users in such development. Manufacturers are providing more ready to use products, increasing the processing component of the product, ultimately increasing the chances of foreign objects contamination. Foreign object contamination can be detrimental to a companies reputation, leading to costly recalls or expensive litigation. Detectapro would like to work with your company in achieving a reduction in foreign objects contamination.

ORGANIZATION OVERVIEW

Choosing durable, hygienic, and chemically resistant TUFCEM™ Tiling Systems fully-vitrified process flooring from ErgonArmor is a smart investment, delivering great looks AND performance that will turn your production areas into a showplace. Choose from a variety of colors and anti-slip textures in traditional rectangle or distinctive hexagonal shapes. The epoxy THINSET vibration setting process means less lippage and more impact resistance.

ErgonArmor helps food and beverage processors protect people, assets and the environment through the supply of corrosion-resistant construction materials. In addition to state-of-the-art TUFCEM Tiling Systems fully-vitrified tile, we offer acid brick, epoxy, and cementitious flooring solutions; anchored thermoplastic liners for wastewater tanks and pits; expansion joint sealants; water-proofing membranes; polymer concrete underlayments and structural grouts.

Brands: TUFCEM Tiling Systems, PENNTROWEL™, THINSET™ Adhesive, FURALACT™, PENNCOAT™, PENNTROWEL™ WC Grouts, and FLEXJOINT™ Joint Sealant

(866) 826-9725
plantoptics.com

KEY CONTACT
Leah Muenchow, Sr. Product Advisor & Marketing Coordinator
leah.muenchow@plantoptics.com

ORGANIZATION OVERVIEW
As the exclusive AVEVA Software support and sales resource for the upper Midwest, GS PlantOptics remains committed to helping people and organizations build and leverage their industrial data foundation to achieve operational excellence, agility, and sustainability through:

- Local Technical Services & Support: Product training, technical support, and success services to gain maximum value from your AVEVA implementation

- Industrial DataOps: Develop a data framework that lays the foundation for operational excellence through enterprise-wide visibility - bringing together operations and production data for end-to-end process insight

- Monitoring & Control (HMI/SCADA): Leverage new technology to automate and connect control systems and bring visibility into operators' hands for improved efficiency

- Product Optimization: With control layer automation as the backbone, improve production through material management, logistics, quality monitoring, asset performance management, health & safety tracking

- Advanced Process Data Analytics: Consolidate, validate and visualize process data to reveal insights and drive optimized business outcomes

- Solutions for OEMs, Machine Builders: Unique applications including automation and control, data management, and content delivery

GS PlantOptics has earned a reputation as a customer-first, value-driven automation partner. We serve customers throughout Iowa, Minnesota, North Dakota, South Dakota, Wisconsin, and the Upper Peninsula of Michigan.

HANDTMANN PROCESS

11 Arthur-Handtmann-Straße, Biberach an der Riß,
Baden-Württemberg 88400
Germany

49-1-51-14-024907

KEY CONTACT

Clemens Lutz, Area Sales Manager America
Clemens.Lutz@handtmann.de

ORGANIZATION OVERVIEW

Handtmann Process is the process division of the Handtmann group of family-owned companies that have just celebrated their 150th year in business. In fact this was the first company, and though AHA was born in a German brewery our division quickly built a reputation for excellence that dairies could not resist. AHA specializes in the safe and reliable distribution, filtration and separation of liquid foods, and is one of the leading providers of fittings, valves and processing plants.

For the dairy industry, Handtmann is a world leader in the design, construction and commissioning of Lactoferrin (LF) extraction systems with the capability to supply complete turnkey LF plants to whey or skim milk plants. Utilizing Handtmann designed radial flow chromatography columns, customers have seen large gains in LF yields by replacing older technologies with our state-of-the-art column designs.

Of particular interest due to increased costs of chemicals, waste charges and stringent wastewater regulations is the AHA Caustic Recovery Filtration system. The use of these systems to clean spent CIP solutions and reuse them for long periods of time have led to considerable cost savings for our customers.

These can also be paired with our Handtmann designed CIP stations that can generate and deliver CIP solutions for any dairy need from milk truck cleaning to UHT and evaporator cleaning. Whether piping systems for liquids and gases, CIP cleaning systems, filtration and absorption technology, pressure control devices or prefabricated assemblies - AHA delivers.

hygiena.com

KEY CONTACT

Michael Hahn, Senior Sales Manager
mhahn@hygiena.com

ORGANIZATION OVERVIEW

Hygiena™ provides rapid microbial detection, monitoring, and identification systems to improve food safety globally. Hygiena's EnSURE Touch™ Monitoring and SureTrend Cloud System collects, analyzes, and reports data from multiple quality indicators, including ATP, and indicator organisms including TVC, Coliform, and E. coli. GlutenTox® and AlerTox® products are trusted by food manufacturers and consumers to identify allergens in food products and environmental surfaces. Hygiena's BAX® System, uses PCR technology to identify pathogens in food ingredients, finished products and the environment.

The Innovate System provides product quality control data for UHT processed and aseptically filled products, ensuring long shelf-life. The RiboPrinter® System is an automated genetic-based system that identifies and characterizes bacteria which helps food processors monitor microbial trends in their facility and trace contamination back to its source. Hygiena is committed to the mission of providing customers with high-quality innovative technologies that are easy-to-use, reliable and backed by excellent customer service and support.

Headquartered in Camarillo, California with offices in the UK, Canada, Mexico, Spain and China, Hygiena has products in more than 100 countries. For more information, visit www.hygiena.com/food-safety-solutions

INTEGRATED PACKAGING MACHINERY

801 Fox Row Ct, Rockford, MI 49341
(616) 531-7758
callipm.com

KEY CONTACT

Tom Wiersma, Business Development Director
tom.wiersma@callipm.com

ORGANIZATION OVERVIEW

Integrated Packaging Machinery (IPM) is an intentionally OEM-neutral integrator of complete secondary packaging systems and mission-critical unit operations. We design or custom-engineer, specify, procure, integrate, install, automate, commission and support highly regulated, high-value and high-volume packaging systems and solutions. IPM's design, integration and controls scope typically includes all post-manufacturing unit operations in the packaging line from processed product hand-off to wrapped and labeled inventory-ready pallets. Our customers doing business in highly regulated plant environments have come to expect flexible and sustainable UPTIME packaging systems that are uniformly easy to control, operate and maintain. Many customers also rely on IPM's full-line OEM-neutral operator training designed and facilitated to seamlessly bridge the "white spaces" between OEM technologies in the packaging line.

IPCO US, LLC

10a Bloomfield Ave, Pine Brook, NJ 07058
(773) 633-8129
ipco.com

KEY CONTACT

Kyle Tripp, Sales Engineer - Midwest
kyle.tripp@ipco.com

ORGANIZATION OVERVIEW

IPCO manufacturers stainless steel conveyor belts for Cheese Casting Conveyor Systems. Stainless steel is the material of choice for handling food, pharmaceuticals and other materials when absolute hygiene must be maintained. It is essentially inert, posing no risk of cross contamination, tainting, chemical reaction, toxicity or corrosion.

IPCO conveyor belts are, as standard, delivered in a cold-rolled condition with a mill finish and have well-rounded edges. The conveyor belts can be supplied in open lengths, with the ends prepared for welding on site, or in endless condition with a welded joint.

The strength and durability of the steel conveyor belts, combined with its hygienic properties, make it suitable for conveying a wide range of product, from hot to cold, corrosive, abrasive or heavy.

ORGANIZATION OVERVIEW
KDV Label is a manufacturer of custom labels: pressure sensitive, unsupported film, promotional, variable content, expanded content, and more. Leading with service since 1974, brands choose KDV for the craftsmanship, creativity, and care we put into working with each customer, not to mention working hard to help ensure our customers get the best value for their packaging dollar.

Over the years, we have built a reputation for delivering top-notch labels consistently paired with top-notch service for customers. And not surprisingly so since our founders and namesake, Karen and Dick Vaughn, will forever be at the heart of our brand, by name and principles. They built KDV Label as reliable, trustworthy, and straightforward by focusing on the best interest of their customers and employees. They made it KDV's mission to help maximize each person's and each brand's value.

Because we are focused on maximizing the value of your brand, we naturally and obsessively serve your needs. This is how KDV has become a leader in the label industry – we have been LEADING WITH SERVICE SINCE 1974, and promise to continue that tradition. Let us put our experience to work for your packaging needs.

KEENLINE CONVEYOR SYSTEMS, LLC

1936 Chase Dr, Omro, WI 54963
(920) 685-0365
keenline.com

KEY CONTACT
John Schuster, CEO & Owner
JohnS@Keenline.com

ORGANIZATION OVERVIEW
Keenline has been closely and privately owned and in operation for over 75 years. Our modern design, production, fabrication, and assembly plant is located in the heart of the Fox Valley in Wisconsin and consists of over 30,000 square feet for production and assembly. Our location in the Fox Valley is the perfect location to benefit from resources that allow us to make, design, and manufacture our top-quality Keenline Conveying Systems.

Our nationwide reputation for sanitary and super-sanitary conveyors has been the result of our ability to continually develop and handle innovative designs in a constantly changing material handling industry, and our attention to detail in building our All-American made conveyors is the reason why our customers come back to purchase conveyor systems from Keenline time after time and refer to us warmly as their “conveyor guys.”

Everything we do at Keenline, from design, manufacturing, and assembly, is done under the motto of “neat, clean, and efficient” - as it is how we have done business for over 75 years, both in operations and the way we conduct our business.

Keenline Conveyor Systems manufactures custom conveyor systems made of both stainless steel and/or carbon steel for a wide variety of applications. All conveyor systems are pre-engineered, field-proven, and modularized for application flexibility. Keenline Conveyor Systems serves a variety of industries including food processing, paper, automotive, dairy, beverage, packaging, and metalworking. You can find Keenline conveyors throughout the United States and internationally.

KEY CONTACT

Meg Hohn,
mhohn@larsonengr.com

ORGANIZATION OVERVIEW

Larson Engineering was founded in 1979 in White Bear Lake, Minnesota and has expanded to include 13 offices in 10 states. Our roots are in providing consulting engineering services to architectural and industrial clients. Today, we are a trusted partner in each step of the design process. Larson's structural, civil, process industrial, oil & gas, mechanical, electrical and curtain wall engineers each have their own specialty. Whether it's design of blast-resistant structures, slip formed silos or a biomass receiving and material handling system, we have the expertise to make your project a success. Our conscientious engineers guide clients toward the best solution for their unique needs.

LAUDE CHEESE MOULDS

Heembadweg 3, Ter Apel, Groningen 9561 CZ Netherlands

KEY CONTACT

Almar Rienstra, Sales Manager
almar.rienstra@tetrapak.com

ORGANIZATION OVERVIEW

In 2022 Laude celebrated its 60th anniversary and ever since we have continuously set the bar in cheese mould design & performance, being world market leader from day one.

From inventing world's first plastic cheese mould in 1962, to perfectly shaped, fully welded, micro-perforated and grooved designs, exceeding today's highest market standards and making our reliable cheese moulds essential for every cheese maker.

Experience, ongoing research, eye for detail and close involvement in cheese making. It is precisely these strengths that enable Laude to provide top-quality cheese moulds and support, that are the basis of your end product: a quality cheese, tasty and of the right shape, that will be enjoyed all over the world.

LYRAS NORTH AMERICA INC.

Lyngvej 7, Aalborg, NJ 9000
Denmark
(453) 939-3535
lyras.com

KEY CONTACT
Ruben Riksted, Marketing Manager
Rar@lyras.dk

ORGANIZATION OVERVIEW

At Lyras we have developed a revolutionizing technology to remove microbiology from liquid food products. The technology called Raslysation uses UV-light to remove Bacteria, fungi, and spores from the liquids. It does this with 60-90% less energy use and 60-80% less water use than traditional pasteurization.

The equipment is designed to fit to any flow rates and in all production types, anything from dairy to juice, Enzymes and wine.

Raslysation tm Sirius is our flagship unit and it is able to handle even the most sensitive products in a gentle and efficient way, ensuring high quality production, shortened CIP times and optimized workflow.

(320) 554-3611
massmanautomation.com

KEY CONTACT

Mark Suchy, VP of Sales and Marketing
mark.suchy@massmanllc.com

ORGANIZATION OVERVIEW

Massman Automation offers packaging equipment designed to achieve reliable, high-performance production. With a strong focus on designing safe, efficient, high-quality machinery, we build Case Packers, Cartoners, Pouch Fillers, Palletizers, Case Erectors, Sealers, and more. Capable of providing a single machine or an entire end-of-line solution has allowed us to serve a wide range of customers in the Food, Beverage, Water, Dairy, Poultry, Consumer Goods, Paint, Chemical, Building Trades, Nutraceutical and Pharmaceutical industries. As a long-standing champion of quality and service, Massman Automation has a reputation of excellence in the packaging industry.

SOLUTIONS

Case Packers: Massman has case packer solutions for every application, including a 40lb Cheese Block Case Packer Machine. From small footprint, low-speed applications to large high speed continuous motion case packers our case packers handle wraparound, RSC knock down, display ready cases, harness style, and tray blanks.

Flexible Pouch Packagers: Massman pouch fill and seal equipment handles virtually all types and sizes of pouches including stand-up resealable pouches (SURPs). These pouches are popular due to their low weight and on-the-shelf advantages.

Palletizers: Massman offers small footprint low-cost gantry palletizers and robotic palletizers capable of handling multiple conveyor lines.

Cartoners: Massman builds cost-effective, innovative, fast, and built to exceed customer expectations.

EXTENDED CAPABILITES

As part of the Massman Companies, we provide packaging solutions from the beginning to the end of your line and everything in between. Here is a sampling of additional solutions we build.

- Unscramblers
- Cappers
- Orienters
- Conveyors
- Liquid Fillers
- Shrink Bundlers, Wrappers & More

MOLEAER, INC.

3232 W El Segundo Blvd, Hawthorne, CA 90250
(424) 558-3567
moleaer.com

KEY CONTACT

David McClure, Business Development Manager
dmcclure@moleaer.com

ORGANIZATION OVERVIEW

Moleaer's Nanobubble Technology is Helping Industrial Wastewater Treatment Plants Increase Treatment Efficiency and Capacity with Lower Energy and Chemical Footprint

Revolutionize your industrial wastewater treatment in the food and beverage sector using cutting-edge nanobubble technology. From dairy manufacturing facilities to poultry processing plants, our advanced wastewater treatment solutions harness the unique properties of nanobubbles to address the challenges posed by high-strength waste. Due to food safety standards and rigorous Clean-in-Place (CIP) procedures, food and beverage processing waste has high concentrations of antimicrobial compounds that inhibit the proper operation of biological treatment processes and increase biological oxygen demand (BOD). Paired with fats, oils, grease and proteins, these compounds cause inefficiencies in treatment. Nanobubbles help break down and inactivate these compounds to significantly improve the quality of treated water, reduce environmental impact, and streamline your overall industrial processes. Experience a new era of wastewater treatment excellence with our tailored nanobubble solutions for the food and beverage industry.

MOTION CONTROLS LLC

1174 Western Dr, Hartford, WI 53027
(262) 673-9255
motioncontrolslc.com

NEO WATER TREATMENT

8101 E Prentice Ave, Suite 525, Greenwood Village, CO 80111
(303) 843-8065
neowatertreatment.com

KEY CONTACT

Logan Wherry, Sales Manager
l.wherry@neomaterials.com

ORGANIZATION OVERVIEW

Today's water purification professionals face ever-tightening regulatory standards, pressures to cut costs and increase efficiencies, and growing concerns by the public over nutrient loading of freshwater resources. Legacy chemicals and processes are struggling to keep pace with the new realities of today's water treatment challenges.

Neo Water Treatment's Neo WaterFX300 (formerly RE300) product is helping water treatment professionals in North America and Europe meet these challenges – and more.

Neo WaterFX300 (formerly RE300) has delivered these results to treatment plants in North America and Europe:

Phosphorous reduction – far more efficient than conventional products

Sludge volume reduction – reduced coagulant contribution and higher solids content

Reduced polymer requirements

Less pH impact

Enhanced dewatering

Minimal infrastructure disruption

Reduction in nutrient contributions that can feed freshwater algae blooms

NERCON CONVEYOR SYSTEMS

600 S Commercial St, Neenah, WI 54956
(844) 293-2814
nerconconveyors.com

KEY CONTACT

Debbie Hoff, Marketing Manager
dhoff@nercon.com

ORGANIZATION OVERVIEW

Nercon supplies conveyors built to cheese and dairy processors' specific requirements needed for hygienic product handling of raw and packaged foods. Our HydroCore® sanitary line of conveyors and equipment meets cheese and dairy manufacturers' regulations for food-safe conveyors handling various product and packaging sizes with operational efficiency, reliability, and durability.

NORTHWOOD INGREDIENTS

410 Cordoba Ave, Cedar Falls, IA 50613
(801) 388-4861
northwoodingredients.com

KEY CONTACT
Michael Arrett, President
marrett@northwoodingredients.com

ORGANIZATION OVERVIEW

Northwood Ingredients is an established physical food commodity trading firm that seeks to be a trusted partner to both our suppliers and customers. Founded as Northwood Dairy Sales in 1983, the company began with a focus on a range of dairy products. Since that time our scope has expanded to include the purchase and sale of diverse ingredients across the food industry.

Today Northwood Ingredients continues to work to earn the trust of both its suppliers and customers in all sectors. This trust is built upon the strength of relationships the company, and its team, foster with other industry players. At Northwood we recognize that maintaining these quality relationships, more than anything, contributes to the success of the company.

NOVASINA AG

12 Neuheimstrasse, Lachen, Schwyz 8853
Switzerland

41-55-642-6767
novasina.ch

KEY CONTACT
Philippe Troesch, CSO / Sales and Marketing Director
philippe.troesch@novasina.ch

ORGANIZATION OVERVIEW

Novasina provides reliable and accurate humidity & temperature sensors for any air conditioning/control system or monitoring solution. Our humidity sensors are specifically designed to maintain unmatched accuracy, even with the high humidity and ammonia concentrations typically found in cheese cellars. Novasina develops and manufactures its own sensors in Switzerland to provide best results and optimal solutions for dairy and cheese producers, contractors, and quality assurance managers.

NOVONESIS

(414) 290-7033
oldnational.com

KEY CONTACT
Jason Eggert, Senior Vice President
jason.eggert@oldnational.com

ORGANIZATION OVERVIEW

Old National Bancorp (NASDAQ: ONB), the holding company of Old National Bank, is the largest bank holding company headquartered in Indiana. With more than \$49 billion of assets and \$34 billion of assets under management, it ranks among the top 35 banking companies based in the U.S. and has been recognized as a World's Most Ethical Company by the Ethisphere Institute for 11 consecutive years. Since its founding in Evansville in 1834, Old National Bank has focused on community banking by building long-term, highly valued partnerships and keeping our clients at the center of all we do. Today, Old National's footprint includes Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota and Wisconsin. In addition to providing extensive services in retail and commercial banking, Old National offers comprehensive wealth management, investment and capital market services.

ONE MOTION

2120 Town West Dr, Rogers, AR 72756
(479) 358-1173
onemotion.tech

KEY CONTACT
Steve Wiley, Director of Marketing
steve.wiley@actionpaq.com

ORGANIZATION OVERVIEW

One Motion products use magnetic, direct drive technology to power belt conveyors. Each shell rotates by magnets pushing against each other. This design eliminates the nooks and crannies caused by conventional motor/gearbox systems where food debris and bacteria are typically found. No energy is lost through gears. Instead, the magnets rotate the shell directly. This one transfer of energy improves efficiency by as much as 54%, which cuts down on production costs and dramatically improves GHG emissions.

ONE SOURCE RISK MANAGEMENT

purebio.com

KEY CONTACT

Tyler Mattson, VP of Key Accounts and Technology
tmattson@purebio.com

ORGANIZATION OVERVIEW

PURE Bioscience, Inc. (OTCQB: PURE) is focused on developing and commercializing our proprietary antimicrobial products that provide solutions to the health and environmental challenges of pathogen and hygienic control. Our technology platform is based on patented, stabilized ionic silver, and our initial products contain Silver Dihydrogen Citrate (SDC). SDC is a broad-spectrum, non-toxic antimicrobial agent that is manufactured as a liquid and delivered in various concentrations. We currently manufacture and distribute SDC-based disinfecting and sanitizing products, which are registered by the United States Environmental Protection Agency (EPA), the United States Food and Drug Administration (FDA) and Health Canada. We also manufacture and sell SDC-based formulations to manufacturers for use as a raw material ingredient in the production of personal care products. We believe our technology platform has potential application in a number of industries and we intend to focus our current resources on providing food safety solutions to the food industry.

ORGANIZATION OVERVIEW

Raman Smart Process Solutions (Raman SPS): we are providing unique and innovative solutions for dairy processes. Raman SPS in partnership with Nordic Dairy Technology (NDT) supplies automatic lines for paneer production, cheese VATs, and specialty machines such as cheese cutters, ribbon mixers, and halloumi VAT. NDT is one of the largest suppliers of cottage cheese VAT. NDT cottage cheese VAT provides higher yield and better quality of product.

Raman SPS in partnership with NDT has successfully commissioned several cheese projects in Canada including the supply and installation of a Ribbon mixer for ricotta, halloumi (complete automatic line), Paneer cutter, and drum drainer. We have been recently awarded a contract to supply a new paneer line with automatic moulding at the capacity of 2000 kg/h.

NDT can help dairy manufacturers in

-Closed cheese VAT and Double O VAT for Mozzarella

-Drum drainer and drain tables

-Cheese cutting

-Automatic Paneer, Ricotta, and Halloumi lines

-Automatic Pick and Place

(514) 270-2090
rheolution.com

KEY CONTACT
Anis Hedj Henni, CEO
anis.hadjhenni@rheolution.com

ORGANIZATION OVERVIEW
 Founded in 2009, Rheolution manufactures and supplies the CoaguSens™ family of instruments, specially designed to measure and control milk coagulation for the cheese and yogurt industries.

The CoaguSens™ Flex stands out as a portable instrument designed for formulating and fine-tuning cheese recipes, troubleshooting production challenges, and precisely measuring ingredient dosages.

In contrast, the CoaguSens™ Connect plays an indispensable role in industrial cheese production. It's a groundbreaking, PLC-connected device that revolutionizes the process by offering real-time monitoring of curd firmness during milk's enzymatic coagulation. With its ability to initiate the cutting phase precisely at the optimal firmness, this innovative instrument maximizes output from every vat, setting new standards in production efficiency.

ORGANIZATION OVERVIEW
Welcome to Sanitube™, the leading manufacturer of sanitary-grade stainless steel tube, valves, and fittings. Sanitube products are precision engineered to meet 3A specifications and to withstand the most challenging operating environments in the food, dairy, beverage, cosmetic, pharmaceutical, and industrial markets. Sanitube's campus spans five buildings comprising over 100,000 square feet of enclosed production and warehousing space in Lakeland, Florida. Our growth is driven by our commitment to providing superior product availability, service, and quality to our customers. Speaking of growth, Sanitube now offers an in-house valve automation department specializing in pneumatic actuation solutions for butterfly and ball valves. Additionally, Sanitube continues to develop new products in its state of the art custom fitting fabrication facility. The production of non-standard fittings now allows Sanitube to offer distributors a single source for not only standard tubing, valves, and fittings, but also custom, made-to-order spool pieces, custom fitting configurations, and cut to length tubing.

Utilization of modern, technologically advanced welding and fabrication equipment allows Sanitube to manufacture the highest quality sanitary fittings available, with efficiency unmatched by competitors. Higher efficiency allows for superior product availability, traceability, quality, pricing, and one of the lowest lead times in the industry. Of course, every Sanitube product is manufactured in accordance with strict quality control procedures, and all Sanitube products are backed by our limited warranty.

SCHINDLER & WAGNER GMBH & CO KG, DIPL.-ING.

Manfred-Schindler-Straße 1, Plüderhausen, Baden Württemberg 73655
Germany

KEY CONTACT
Mandy Richter, Sales & Marketing
m.richter@schiwa.de

ORGANIZATION OVERVIEW
Schiwa offers you customized and standardized high performance machine systems – and thanks to our leading technology and flexibility, provide an outstanding basis on which to build your business success. When it comes to reliability, profitability, hygiene and product yield, every inch of your Schiwa logistics chain is configured to deliver top quality.

Synchronised feed, scanning, pre-weighing, cutting, portioning, weighing, grouping, buffering, loading

... these nine steps are of vital importance for transforming cheese into retail-ready products.

Because they are designed as integrated, computer-controlled complete solutions, Schiwa production lines have them all covered; precisely the support that your sales strategy needs.

(708) 562-7290
scholleipn.com

KEY CONTACT
Monte Kimball, Director, Retail Business Development
monte.kimball@sig.biz

ORGANIZATION OVERVIEW
By joining forces, we can offer a more comprehensive range of packaging solutions—but we can also better understand our customers' needs and the markets they operate in.

Together, we increase our global presence and can combine our knowledge of individual markets across the world. We know that a product that serves one community well might not fit the needs of another and that a product working well on a small scale in one market can inspire a global shift. By integrating our years of experience and deep understanding of consumer needs, we can strengthen our relationships and connect deeper with the markets our customers serve.

Sharing insights and resources better serves our customers; you can look at this through a few different lenses. For example, a company that wants to expand its grab-and-go snack options might not realize the potential of pouch technology. A brand that wants to target a more diverse clientele might see value in offering its product in various packaging formats, from small, 50 mL sizes to industrial, 1300 L applications.

Sometimes, you don't know what's possible until more options are available. With Scholle IPN and SIG together, we can provide a widely diverse line of packaging solutions that allow customers to expand their market base and consider new and exciting avenues of growth.

(800) 762-7621
smcusa.com

KEY CONTACT

Timothy Huebner, Branch Manager
thuebner@smcusa.com

ORGANIZATION OVERVIEW

SMC Corporation of America is a part of a global organization that supports our customers in every industrialized country and is the U.S. subsidiary of SMC Corporation based in Japan. Since its establishment, SMC has been a leader in pneumatic technology, providing industry with technology and products to support automation based on the guiding principle of “contributing to automation labor savings in industry.” Over the past 50+ years, SMC’s products have become established as a recognized international brand through sales, technical, supply and after sale services in world markets. Sales have grown to achieve a 30% global market share.

Subsidiaries and joint ventures have been setup in a total of 53 countries. Production facilities are located in 30 countries. In addition, a sales network extends throughout 83 countries, with local services in 500 locations. SMC offers technology accumulated through the years, engineers that bring it to life in new products, production capacity which can deliver a variety of products in a short time, and an extensive sales network in the U.S. and throughout the world.

With its goal of ever more advanced automation, and using its many achievements as a base, SMC is developing high quality, highly reliable products to contribute to automation in industry, as well as in familiar areas of everyday life.

SMC is dedicated to deliver first-class business solutions to our customers through superior products and top-notch customer service by creating an environment for our employees where each person is valued, challenged to reach his or her full potential, and contributes to the growth of the company, community and themselves.

Value Proposition

We partner with our end user customers to discover creative ways to reduce overall compressed air and electrical consumption more than anyone else in the industry. Our comprehensive approach focuses on consuming less raw materials in our manufacturing process by making our products smaller

(888) 669-8641

unifidecst.com

KEY CONTACT

Brandon Brookins, Director of Sales

bbrookins@unifidecst.com

ORGANIZATION OVERVIEW

UniFide CST is committed to being recognized as the best provider of testing and calibration service in the eyes of our customers, employees, and suppliers. This is achieved through implementation of our policies, procedures, and work instructions and through our commitment to continually improve our quality management system. All employees performing calibration activities are trained on and expected to know the appropriate and recognized procedure. All personnel strive to meet or exceed customer expectations while maintaining the highest ethical standards. Service (laboratory) activities and documentation meet ISO/IEC 17025 guidelines for all customers whose quality systems require conformance to ISO/IEC 17025.

La Crosse Scale was established in 1948 and quickly created a reputation for superior service and products. La Crosse Scale was added to our family of scale companies in 2011.

WIScale was established in 1995 with a commitment to providing superior products and services in the pursuit of creating a mutually beneficial synergy. Located in Chippewa Falls, Wisconsin, WIScale was added to our family of scale companies in 2018.

Rogan Scale was established in 1964 and quickly became a leader in weighing systems in the Quad City region of Iowa. Rogan Scale was added to our family of scale companies in 2019.

Valley Scale Service was established in 1965 with the goal to serve industrial, retail, and individual customers throughout Northcentral Wisconsin and Upper Michigan.

La Crosse Scale, Rogan Scale, Valley Scale, and WIScale are all owned by Nesnah Ventures, a private equity firm with a long-term focus.

In June 2023, La Crosse Scale, Rogan Scale, Valley Scale, and WIScale came together to do business as one united brand: UniFide CST. This new brand is the next evolution for our family of scale companies, bringing together our tremendous legacy of products and services.

Measurements

michael.kohlmann@vaisala.com

ORGANIZATION OVERVIEW

In order to manufacture high-quality dairy products at a lower cost, dairy processing plants need accurate inline Brix or Total Dissolved Solids (TDS) measurements to continuously monitor and control their operations. These parameters guarantee final products are safe for consumption and meet legal standards on dissolved fats and nonfat solids content. Furthermore, it simplifies the addition of other ingredients using inline dosing and optimizes the whole process to reduce labor, operation, and energy costs.

With over 80 years' experience in industrial, weather, and environmental measurements and over 40 years' experience in refractometer technology, Vaisala has deep knowledge of the needs and requirements of processing industries, in particular the highly regulated food and beverage industry. Vaisala Polaris™ Process Refractometers can be installed to continuously monitor milk standardization, homogenization, milk evaporation, spray drying, reverse osmosis, ultrafiltration, and product and CIP liquid interface detection. Some of the end products we secure include evaporated and powdered milk, infant formula, sweetened condensed milk, whey, and yogurt flavoring.

VEGA Americas provides industry-leading products to the process and automation industries for the measurement of level, pressure, density, and weight. VEGA combines manufacturing, distribution, and service for products that represent the most sophisticated process measurement technologies anywhere in the world.

The company has called Cincinnati home since it was founded here in 1950 under the name of Ohmart. Today, VEGA Americas is a fundamental subsidiary of VEGA Grieshaber KG, a global organization with headquarters in the Black Forest of Germany.

In the last 70 years, the company has not only changed its name, but VEGA Americas has also made countless technological innovations in the world of process measurement instrumentation and experienced consistent, steady growth.

Of the more than 1,480 VEGA employees around the world, a little more than 300 work at VEGA Americas.

Adit Patel, Channel Sales Manager - Dairy
adit.patel@veolia.com

ORGANIZATION OVERVIEW

Veolia Water Technologies & Solutions has served the dairy industry for over 30 years and is a pioneer of membrane technology for sanitary applications. Our Blister-Free membrane elements offer best in class whey demineralization with low contamination risk and high yield.

Veolia provides solutions to meet the unique needs of the dairy industry. They are designed to optimize:

- Concentrating of milk and whey products
 - Isolating and purifying of proteins and sugars
 - Clarifying of brines and milk products
 - Polishing of permeates for water recovery
- Veolia sanitary membranes protect your product quality and brand image, while ensuring increased product safety.

Our technology also covers:

- Pure Water - Filtration components and systems for production of purified water.
- Industrial - Specialized products for industrial applications.
- Municipal - Solutions for safeguarding potable water, and treatment of municipal and industrial effluent.

(262) 903-4894
getvessey.com

KEY CONTACT

Brandon Johnson, Founder & CEO
bjohnson@getvessey.com

ORGANIZATION OVERVIEW

Vessey is transforming the food supply chain by integrating immutable ledger technology to enhance transparency, traceability, cost savings, and security. In response to the FDA's Food Safety Modernization Act (FSMA) requiring electronic tracking of high-risk food products, Vessey has developed a groundbreaking solution that addresses the specific requirements of the soft and semi-soft cheese industry, which is at the top of the FSMA 204 list. Many of the artisan factories producing these cheeses are logged by paper and pencil and located within counties ranked higher on the distressed communities index. This innovative system offers an easy-to-use, cost-effective alternative to traditional ERP systems, allowing cheese artisans to track and record critical events in their production process.

VIBRANT GRAPHICS

westfaliausa.com

KEY CONTACT

Lisa French, Director of Marketing
lfrench@westfaliausa.com

ORGANIZATION OVERVIEW

With 30 years of experience in the automation industry, Westfalia excels at designing and delivering customized systems to enable dairy manufacturers to organize inventory, optimize space and increase efficiency. Using comprehensive data analyses to provide an in-depth, fresh look into how your business operates, we find practical solutions to your material handling challenges and provide rich information about your business. As the sole supplier of triple rail supported pallets, Westfalia's high-density AS/RS can reach up to 18 pallets deep and handle two pallets at one time. Westfalia's Savanna.NET® WES, enables companies to seamlessly direct, control and optimize internal material flow. Paired with our user-friendly fault recovery and visualization tool, Firefly, you can get a three-dimensional, augmented picture of the warehouse, inventory and automated systems to swiftly recover from any faults.

Partnering with Westfalia means more than increasing storage capacity, improving productivity and reducing labor and energy costs. It means developing strong and lasting relationships with you and your team from the early stages of a project to drive company growth and profitability well into the future.
