

Wisconsin State Laboratory of Hygiene COVID Consultation

Who are we?

We are a team of 6 occupational health specialists with a combined 50 years of consulting experience. This team is tasked with assisting businesses in Wisconsin respond to the COVID-19 pandemic and protect their workers.

What can we do to help?

This is a free service to assist businesses with;

- Developing a COVID Exposure Prevention, Preparedness, and Response Plan
- Helping identify potential administrative, engineering, and PPE controls related to COVID exposure in the workplace
- Conducting a job hazard analyses or workplace risk assessments pertaining to COVID

What can I expect from your service?

The business will receive a service term agreement that spells out expectations. Then a consultant will determine if an onsite or virtual visit will be conducted. Prior to the visit the consultant will review any COVID plans already in place to help identify any deficiencies. The consultant will provide industry specific guidance to help businesses understand best practices. The consultant will take notes and rate the business using a COVID Report Card. The business will receive a visit summary following the visit that will include details on recommended improvements. The consultant will be available to provide advice on how to make these improvements.

How do I request a consultation?
