

New Jersey Transition Renewable Energy Certificate (TREC) Program

Summary:

The New Jersey Board of Public Utilities (BPU) approved a solar incentive program to aid in the transition from the Solar Renewable Energy Certificate (SREC) program to another incentive program. The Transition Renewable Energy Certificate (TREC) program recently became effective to provide certainty to solar projects in development. Companies with single or multiple facilities may be eligible for this program.

Time is of the essence. The program has a short lifespan, requires utility approval prior to installation, and must be completed by December 31, 2021.

Solar Array Project Timeline

Opportunity:

For a rooftop of 150,000+ square feet, customers can expect to pay as low as a few cents per kWh for 15-25 years.

- No capital expenditure required
- No ongoing maintenance cost
- Increase sustainability
- Enhance resiliency

Potential 50% or more electricity cost reduction

<p>You could pay:</p> <p>Less than \$.05/kWh</p>	<p>Compared to</p>	<p>Average NJ Utility Price</p> <p>\$.105/kWh</p>
