

WOMEN IN PRODUCTION

education
foundation

Program Overview

The Women in Production program is a virtual course aimed at enhancing the professional development of women production floor employees. It leverages their insights into company culture and processes to foster innovation. By cultivating women leaders, we can improve the manufacturing industry and encourage more women to pursue careers in this field.

Program Audience

Focused on women in production and shop-floor roles in manufacturing, targeting newer team members or those with leadership potential but limited experience. Common job titles include engineering administrator, sales manager, executive assistant, operational prefect, office manager, and industry analyst.

Program Format

100% Virtual

Recorded lessons are available throughout the program, allowing participants to learn at their own pace with a weekly commitment of about 60 minutes.

Professional Development

The program includes a StrengthsFinders skills assessment, four sessions of one-on-one coaching with a certified coach, and monthly peer discussions to build a robust professional network.
