

# WOMEN IN PRODUCTION

## Overview

Women in Production is a 20-week, virtual program providing leadership development and durable skills to women working in production and shop floor roles. These skills are essential to build thriving careers, successful workplaces, and a resilient manufacturing workforce.

## Audience

The program is ideal for newer team members or those with leadership potential but limited leadership experience. Common job titles include production/shift supervisor, assembler, operator, technician, line owner, and team lead.

## Format

- 100% virtual, asynchronous coursework
- 60-minute per week commitment
- Learn at your own pace
- One-on-one coaching with a certified coach
- StrengthsFinder skills assessment
- Monthly, live peer discussions that foster networking

## Coursework

Recorded content released on these dates:

7/7	Time Mastery
7/21	Safety Mindset
7/28	Emotional Intelligence
8/4	Customer Perspective
8/18	Conflict Resolution
